Syihabuddin Al-wahidy, Ahmad, 09210039, 2013, Thesis, title: management of brethren in syadziliyah congregation family in Bulurejo Diwek Jombang, thesis, major: Al Ahwal As Syakhsiyah, Faculty of Syari'ah. State Islamic University (UIN) of Malang.

Advisor: Dr. Badruddin, MHI.

Keywords: Family Management, brethren, Syadziliyah congregation

Congregation is a manner that is pure of Islamic principles. The purpose of congregation it self is to bring back human morals that all this time is gone in order to recreate Muslim's personalities. Therefore, there many impacts as the results caused by using tasawuf method, though from the moral values, social values also spiritual values which are then applied in the real world in society.

Spiritual power that is built will influence their own, another person even their family. Family that is the smallest unit of the society needs guidance continuously as the configuration of harmony values.

The research method used is qualitative, and for the data collection techniques used are observation and interview. As for checking the validity of data using triangulation theory and for data analysis using data reduction, data display and verification. The results shows that through the efforts of planning pre- marriage or post-marriage and through dhikr done by brethren Syadziliyah congregation which is could make these families better than ever. As for the understanding of family management, it is happen to be a dream for the fellows of the congregation so that many of them who enter into the congregation with the aim to improve, learn, establish and foster families.

From the result of this research it can be concluded that from the comprehension of the in brethrens Syadziliyah congregation in Bulurejo Jombang about family management is a program that is conducted in the perspective of this congregation.
