

ABSTRACT

Hamidah, Siti. (2015). *Tolerance of Pencak Silat Schools (Pagar Nusa, Kera Sakti, PSHT)*, Thesis, Faculty of Psychology. State Islamic University Maulana Malik Ibrahim Malang.

Supervisor : Dr. Ali Ridho, M.Si

Key Words : *Tolerance, Pencak Silat*

The conflict between Martial Art School (*Pencak Silat*) often happens in Indonesia and it causes many loss for various parties. As a result, the society no longer sees *Pencak Silat* as something positive since peaceful situation is hardly found. It needs some efforts to realize a harmonic relationship among the groups of *Pencak Silat* school. In his book entitled "Living Values Activities For Young Adults" (2004:94), Tilman says that peace is the purpose and tolerance is the method. Tolerance teaches us to respect every individual along with his/her dissimilarities through understanding. A relationship can be well developed by showing tolerance for each other. This study aims to find out the tolerance level of *Pencak Silat* school and its implementation in the related *Pencak Silat* school.

Use mix methods (mixed qualitative and quantitative methods) will make the problem known with maximum. The first process is to conduct free guided interviews with coaches from three pencak silat Schools to dig the tolerance in the pencak silat and subsequent school is done on the scale of deployment of 25 members of each School pencak silat with 30 number of aitem to know the level of tolerance in martial arts school with the help of the program SPSS 7.0 for windows using the Anova F-test.

Based on the analysis of SPSS, discovered the value of $F = 10.067$ and $p = 0.01$ ($p = 0.00 = \text{significant}$) It shows difference in the level of tolerance between the Schol of one another. Through the Mean hipotetik known 100% member of the school Pagar Nusa in the level of tolerance is low, Kera Sakti school 100% in a low tolerance level and PSHT school 100% in low tolerance. Furthermore, the Post Hoc analysis was conducted to find out the difference in the level of tolerance. The study employs mix methods which will make it easier to answer the research problems. The result of study points out that all *Pencak Silat* schools namely Pagar Nusa, Kera Sakti, and PSHT are categorized into the low level of tolerance. Pagar Nusa contains Mean = 61.92, PSHT contains Mean = 53, and Kera Sakti contains Mean = 49.76. Thus, it can concluded that Pagar Nusa has a low level of tolerance, PSHT has a lower level of tolerance, and Kera Sakti has the lowest level of tolerance. Martial arts school which has teachings on tolerance only school PSHT, but this has no effect on

the level of tolerance as evidenced by the level of tolerance of PSHT school Pagar Nusa that has no teaching of tolerance. Factors that influence the results of the research are very prone to environmental conflicts between the School of Silat and the lack of cooperation between the leaders of the School of silat (Coach) with the Police as an effort to create peace.
