

ABSTRACT

Rokhmat, Amin. 2015. Effect of Cigarette Bad Impact Understanding on Smokers Empathy.

Supervisor: Dr. Fathul Lubabin Nuqul, M. Si

Keywords: Understanding, Empathy

Every person has a different understanding and knowledge, especially about the bad effects of smoking. This is realized, because we all know that smoking is harmful to health. But in reality many adolescents and adults who smoke and there are smoking around secondhand smoke which of course is bad for others as well. Then the individual empathy is one of attitude that is needed in order to overcome this problem. Empathy makes people understand what the other person feels and thinks. This study discusses (1) The level of understanding of the bad effects of cigarettes (2) The level of smokers empathy (3) is there any Effect of Cigarette Bad Impact Understanding on Smokers Empathy.

The design of this study used a quantitative approach which correlation type and population are taken from students (mahasantri) of Sunan Ampel Mahad Al-Ali Ibn Sina Dormitory of the State Islamic University of Maulana Malik Ibrahim Malang that active in the academic of 2014-2015. Data collection method used in this research through observation, questionnaires, and documentation. The result of understanding different power scale of the bad effects of cigarettes of 25 items, which was received to produce 17 items that were accepted and 8 items were disqualified or removed. On a scale of smokers empathy of 25 to produce six items that were accepted and 8 items were disqualified or removed. This analysis used the *product moment Pearson* correlation.

Results of research on understanding the bad effects of cigarettes with smokers empathy showed that (1) The level of understanding of the bad effects of smoking on mahasantri of Sunan Ampel Mahad Al-Ali Ibn Sina Boarding Maulana Malik Ibrahim State Islamic University of Malang obtained 29 or 50.8% of the 57 people currently on high level, found 28 people or 49.2% of the 57 people were at a moderate level, and obtained 0 people on a low level. So understanding the bad effects of cigarettes in Sunan Ampel Mahad Al-Ali Ibn Sina Boarding UIN Maulana Malik Ibrahim Malang was located at High category, (2) The level of smokers empathy on mahasantri of Mahad Sunan Ampel Al-Ali Ibn Sina Boarding UIN Maulana Malik Ibrahim of Malang obtained 28 people or 49.2% of the 57 people were at a high level, found 29 people or 50.8% of the 57 people were at a moderate level, and obtained 0 people on a low level. So that the smokers empathy variable in Mahad Sunan Ampel Al-Ali Ibn Sina Boarding UIN Maulana Malik Ibrahim of Malang was located at the medium category, (3) The results of the correlation understanding of the bad effects of cigarettes to smokers showed smokers empathy of r_{hit} value of 0.290 and known value of N was 57 people with a $p = 0.029 < 0.05$. So

the probability was less than 0.05 so that H_0 rejected and H_a accepted, it meant understanding the bad effects of smoking on mahasantri of Mahad Sunan ampel al-ali Ibn Sina Dormitory of the State Islamic University of Maulana Malik Ibrahim Malang had a relationship (correlation) with smoker's empathy
