Keywords: Psychological wife, Siri Polygyny

Marriage can not be separated from a normal human life, Islam allows a husband to have more than one wife (polygyny), but not require it or recommend it. The permissibility of polygyny is a small emergency door through which the current is very necessary or in other words can be used as emergency exit that is preventive and not a light to those terms. There are various sorts forms of marriage within society namely marital monogamy, polygyny, polyandry and marriage groups of (group marriage). As for some of the terms and considerations that must be met a husband if you want to make polygyny, such as the husband must provide adequate housing and separates the living from the first wife, gave a fair living among them, divide their time equally between them, and treat them fairly well.

This research carried in the village of South Bugul Tapaan Pasuruan District. Formulation of the problem of this study is what factors are the background for the occurrence of polygynous marriage by siri and how psychological problems due to polygynous wives by marriage Sirri. The answer to these questions are expected to know what factors are the background for the occurrence of polygyny by siri marriage and how the wife of psychological problems due to polygynous marriage by Sirri. This research uses qualitative research, while the data collection method used in this study is the observation, interviews, and documentation, to analyze the data use descriptive qualitative research.

Based on the results of field research can be seen that the background factors of polygyny by siri marriage is a factor that is not the legality of the consent of the wife's first, self-esteem factors, religious factors and economic factors as well as education. While the psychological impact of the first wife was hurt, feeling irritated and annoyed, feel guilty about yourself, no good meal, often venting his frustration to his son, often told his story to a neighbor about the things that happen in the household, jealousy, communication is lost, and the resulting competition among wives. Whereas psychological impact from wife second one is sick the liver, feel irritated and annoyed, jealous, arise rivalry fellow wife of, often suspiciously, lose confidence of self, feel not helpless, and often worried.
