

ABSTRACT

Fitriyah, Lailatul. 2015. **Correlation between Democratic Parenting and Juvenile Delinquency in MA (Islamic Senior High School) Al-Azhar Serabi Barat Modung Bangkalan.** Faculty of Psychology, the State Islamic University of Maulana Malik Ibrahim Malang.

Supervisor: Drs. H. Yahya, MA

Keywords: Democratic Parenting, Juvenile Delinquency

Democratic Parenting is a parenting in which parents can be relied on guiding and directing the children in order to grow and develop. Whereas the juvenile delinquency is a deviant behavior which made by 12-18 years old children, the behavior categorize as norm and law violation that applies in society.

This research aims to understand the correlation or relationship between democratic parenting as independent variable and juvenile delinquency as dependent variable. Amount of respondents are 45 students. Questionnaires used as the collection of data method. The questionnaires consist of 2 type namely democratic parenting and juvenile delinquency questionnaires, and each part of the questionnaires consists of 35 and 30 item. Data analysis technique used is a product-moment technique.

Based on the analysis, the results show as follows: in the democratic parenting variable shows that 45 students (100%) have a high democratic parenting and there is no students who have intermediate or low parenting. While the juvenile delinquency variable shows that there is no students who have done a high delinquency, but 16 students (35,56%) have done en intermediate delinquency, and 29 students (64,44%) have done a low level delinquency.

The results of research between the two variables are: $r_{xy} = -0,050$; with $p = 0,745 > 0,05$. Based on data analysis, the hypothesis is there is no correlation between parenting and juvenile delinquency in MA Al-Azhar Serabi Barat Modung Bangkalan. Beside, the result acquire a negative number shows opposite relationship, by mean when democratic parenting applied well, so the juvenile delinquency remain low or even lower, and vice versa.
