Job opportunities will be in line sharia accounting practitioners moved at the rapid development of the world economy today. Student perception of sharia accounting practitioners to be one of the efforts to encourage career student interest in sharia accounting.

The data used primary data obtained from the questionnaire collection with the research object of students accounting who have taken courses sharia accounting. Using multiple linear regression analysis with the samples obtained as many as 80 respondents.

Based on the results of multiple linear regression analysis showed that the test value of  $R^2$  (Determinants coefficient) of 0.078 or 7.8%. It can be seen that the ability to explain the independent variable (Perception, Personality, Job Market considerations, Code of Ethics and Social Values ) on the dependent variable (Selection of Islamic Accounting Career Practitioner) by 7.8%, while the remaining 92.2% explained by other variables. Then test f (simultaneously) explained that the variable perception, personality, job market judgment, codes of ethics and social values were equally significant effect on the variable compliance with  $F_{count}$  value of 2.338 and 0.220  $F_{tabel}$  ( $F_{count} > F_{tabel}$ ) and a significance value of  $0.000 < 0.05$ . Whereas the t test (partial) showed that the only variables that have an influence perception (partial) against the election of a practicing sharia accounting career with  $t_{tabel}$  2,156 and  $t_{count}$  1.66412. Because  $t_{count} > t_{tabel}$  with significant value t 0.034 ( $0.034 < 0.05$ ), whereas for the personality variables, labor market considerations, a code of ethics and social values have no influence on the selection of a career in accounting of sharia practitioner.
