

ABSTRACT

Robi, Mimin Fadli. 2013. Correlation Between *Affection Fulfillment* With *Prosocial Behavior* In Teens at Orphanage Sunan Ampel Summersari Malang. Thesis, Malang: Faculty of Psychology. State Islamic University of Maulana Malik Ibrahim Malang.

Pembimbing: M. Mahpur, M. Si.

Kata Kunci: *Affection Fulfillment, Prosocial Behavior*

The background of this research is that prosocial behavior is rarely encountered in the community started along with the advance of technology, especially among the adolescents at this age tend to be more focused on her. There are several factors that cause adolescents are less concerned for the difficulties encountered others and one of them is emotional factors and mood as a form of *Affection Fulfillment* whether or not in adolescents because *affective fulfillment* for adolescence requires more, because at this time a child is in transition. *Affective fulfillment* can be seen in the parental relationship with the child. Children who living in orphanage less *affective fulfillment* because number of caregivers that are not in accordance with the number of foster children. Goals to be achieved in this study is to determine the relationship between *Affective fulfillment* with *prosocial behavior* in adolescents.

In this study, using correlational research. The population in this study were all adolescents at the Orphanage Sunan Ampel Summersari Malang. Sampling was done with a *total sampling*. The sample used in this study were 27 adolescents. Variables in a correlational study consisted of a free variable that *Affective fulfillment*, and the dependent variable is *prosocial behavior*.

Methods of data collection in this study using the psychological scale are *Affective fulfillment* scale and *prosocial behavior scale*. Analysis of research data using *correlation non parametric test* analysis techniques, with the help of a computer program *SPSS 17.0 for Windows*.

The results of the research conducted, it is known that the presence of a statistically significant correlation ($r = 0.850$, $p < 0.01$) in the fulfillment of affection with prosocial behavior in adolescents orphanage Sunan Ampel with correlation coefficient of 0.850.
