

ABSTRACT

Saputri, Dwiny. 2013. *Analysis of Sexual Thinking Construct Female Readers of Online Yaoi Fanfiction*. Thesis. Psychology Faculty of the State Islamic University of Maulana Malik Ibrahim Malang

Advisors: Dr. Moh. Mahpur, M. Si

Keywords: Online yaoi fanfiction, Female Readers, Sexual Thinking Construct, Homosexual.

Online Yaoi fanfiction is a story line that contains the love story of a man who had homosexual relations " gay " with romantic situations and adult material created by a group of enthusiasts and a pair by entering their idols both real and fictional as the characters in it . Aside from being entertainment, online yaoi fanfiction can make female readers to expect that the content of the story actually happened in reality, in other words expect their idols have a real homosexual relationship even able to "awaken" the reader will be their sexual orientation. So in this study intends to determine the sexual thinking construct that is in women online yaoi fanfiction readers who in turn will form the things that have been mentioned previously .

This research was carried out on 2 female readers who like online yaoi fanfiction active to this day for more than 1 year, have a chronological age of 20 years and above, as well as having heterosexual sexual orientation with deep technical interview and observation. Results showed that female readers of online yaoi fanfiction readers who had a preliminary view that sexuality is something that is closely related to the presence of individuals of the opposite sex (men and women) who run the emotional and sexual practice, turned into a view that sexuality is a matter which is closely related to the presence of individuals with gender equality (gender variant / queer) and the opposite sex (men and women) who run the emotional and sexual practices .
