Keyword: spiritual quotient, juvenile delinquency

Teenagers tend to find out their self identity and satisfy their curiosity by trying new things. Teenagers are also easy to be influenced by the change of the attitude and the environments surround them. The changes are not always good and right. But, because of their curiosity, some of them do deeds which are inappropriate with the rules and norms. They need to train their spiritual quotient within them to control themselves from doing inappropriate deeds. Spiritual quotient is an intelligence all people have as like diamond which is shining if it's always wiped. It's used to solve life problems being faced. Spiritual quotient is a foundation to activate emotional quotient and intellectual quotient which can prevent juvenile delinquency to happen.

This research is done by the purpose of (1) to know the spiritual quotient degree of students of SMA Muhammadiyah 2 Genteng, (2) to know the delinquency degree of students of SMA Muhammadiyah 2 Genteng, (3) to know the correlation between spiritual quotient and juvenile delinquency at SMA Muhammadiyah 2 Genteng.

This research uses quantitative method with 81 respondents by using *random sampling*. The data collection uses 2 scales, they are spiritual quotient scale and juvenile delinquency scale. For data analysis, this research uses norm analysis, percentage and correlation of *product moment pearson* analysis, assisted by SPSS 16.0 version for windows.

Result of research done, it's known that (1) the spiritual quotient of the students of SMA Muhammadiyah 2 Genteng is high which 88.89 percent or 72 students. (2) While for juvenile delinquency degree of the students SMA Muhammadiyah 2 Genteng is low which is 87.66 percent or 71 student. (3) it's known as well that from data analysis using *product moment correlation* by the result of correlation -0.681, in which  $p > 0.005$ , so that there is negative correlation between spiritual quotient and juvenile delinquency.
