Rahmah, Maulidatur. 2013. Religious Maturity Relationship with altruistic behavior of Generation 2012 Psychology Faculty UIN Maulana Malik Ibrahim Malang. Thesis, School of Psychology UIN Maulana Malik Ibrahim Malang.

Advisor: M. Bahrn Amiq, M. Si.

Keywords: Religious Maturity, altruistic behavior.

Basically the man has a good nature and behaviour depend to how the environment shape the nature itself. Ability to recognize or understand the value of religion lies in the noble values and express the values in the act and behave. One important thing to note in religion is Maturity in religiousness, the maturity in religiousness will bring the individual to a belief that in addition to a good relationship with God he had to relate well with others and the environment. Seeing the situation lately, helping behavior and family spirit was almost lost in life. Most people already do not care about what happens in their environment. Someone who has a mature religion is able to understand, appreciate and apply the noble values of religion in daily life. While altruistic behavior is a voluntary act of a person to provide assistance to others without expecting anything in return to set aside personal interests.

The purpose of this research was to determine the relationship of maturity with altruistic behavior Generation 2012 Psychology Faculty UIN Maulana Malik Ibrahim Malang.

This type of research uses a quantitative approach. The experiment was conducted at the Faculty of Psychology of Generation 2012 UIN Maulana Malik Ibrahim Malang, with a population of 215 students and 54 students of the sample, sample using purposive sampling, the samples were carried out because of the particular purpose, supporting data in this study were obtained through observation and a questionnaire. The method of data analysis was done by using Karl Pearson Product Moment correlation using SPSS 16.0 for windows.

From the results of the analysis show the level of maturity of religious and altruistic behavior of students in the high category with the percentage of 92,59% to 94,44% and a altruistic behavior for maturity of religion. Based on the results of data analysis using product moment correlation results obtained $r_{xy} = 0.587$ and $sig = 0.000 < 0.05$. This indicates that there is a positive relationship between religious maturity with altruistic behavior.
