Keywords: Family harmony, spiritual intelligence

Spiritual intelligence is a supreme intelligence, the foundation necessary for the proper functioning of IQ (intellectual Quotient), EQ (emotional intelligence) effectively. SQ (spiritual intelligence) not only determines success, but also happiness and can give us the ability to distinguish as well as moral sense. Spiritual intelligence is not growing as an adult, but must be nurtured since early. Harmonious family is built on relationships between family members who get along, love each other, and give respect.

The formulations of the problem to be addressed in this study are: 1. What is the level of family harmony, 2. What is the level of spiritual intelligences, and 3. Is there any influence between family harmony for the spiritual intelligences of the students in MI Miftahul Huda Kedunglumpung Mojoagung Jombang.

The purpose of this study is to determine the level of family harmony and spiritual intelligence MI students Miftahul Huda Kedunglumpung Jombang, as well as the influence of family harmony on the level of spiritual intelligence in students of Miftahul Huda MI Kedunglumpung Jombang.

This research is quantitative and in the form of correlations that aims to discover whether there is influence between variables. Purposive sampling done as many as 57 students were taken from class IV-IV MI Miftahul Huda Kedunglumpung Jombang. The data was collected using a questionnaire or questionnaires, interviews, and documentation. Questionnaire harmony of a family of 14 item with reliability  $\alpha = 0.899$ , spiritual intelligence questionnaire was 26 item with reliability  $\alpha = 0.872$  data which used technical analysis is to classify into three categories: high, medium, low and using simple linear regression. Based on the results of this study concluded: (1) The level of family harmony MI Mifathul Huda students Kedunglumpung Jombang, of the 57 respondents in the lower categories of 0% with a frequency of 0 respondents, the categories are 1.75% with a frequency of 1 respondent, and the high category by 98 , 25% with a frequency of 56 respondents. Therefore, the level of family harmony students Kedunglumpung Jombang MI Miftahul Huda is at a high level, (2) the students' level of spiritual intelligence MI Mifathul Huda Kedunglumpung Jombang of 57 respondents, the lower categories of 0% with a frequency of 0 respondents , categories are at 7.02% with a frequency of 4 respondents, and high categories of 92.98% with a frequency of 53 respondents. So this shows that the majority of students' intelegence of Mifathul Huda Kedunglumpung Jombang has a high spiritual, and (3) there is a positive effect between family harmony to the child level of spiritual intelligence in MI Miftahul Huda Kedunglumpung Jombang, it can be stated with the results of  $r = 0.473$  and  $p = 0.000$ . Value of R Square = 0.223 means that the variables of family harmony may explain the variability of 22.3%, thus there is still approximately 77.7% of other variables that affect the child's increasing spiritual intelligence. and can be expressed by the comparison of the value of  $F = 15.82$  with  $p = 0.000$  and compared with  $FT5\% = 4.00$ , which means that the regression analysis was greater than 15.82 Ft ( $F_{hit} = 15.82 > FT5\% = 4,00$ ). This result means that the hypothesis that the influence of family harmony on the level of spiritual intelligence of children is acceptable. This means that the harmonious relationship within the family, the higher is the level of spiritual intelligence.
