

ABSTRACT

Mufarohah, Luluk, 2012. The Effect of Parental Care Pattern on Emotional Intelligence of Children at MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District. Thesis, Psychology Department, Faculty of Psychology, State Islam University (UIN) of Maulana Malik Ibrahim Malang. Promotor: Drs. Zainul Arifin, M.Ag.

Keywords: Care Pattern, Parent, Emotional Intelligence

Parental care pattern represents a way of the parent in educating and guiding the child in the daily interaction. Emotional intelligence is a personal and social capability which is owned by everyone since they are born. Problems are determined in this research such as: how is the type parental care pattern of students; how is the emotional intelligence of students; and whether there is effect from parental care pattern on emotional intelligence among students at MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District, in period 2011-2012.

The objective of research is to understand the type parental care pattern of students; to a knowledge the emotional intelligence of students; and to figure out the effect of parental care pattern on emotional intelligence among students at MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District, in period 2011-2012.

Research type is quantitative with the correlation design. Such design aims at finding whether there is effect between two variables. Data collection methods include questionnaire, interview, and documentation. The population of Grade I to VI totaled 65. The sample is students from Grade III to VI of MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District, counted to 40 students. The analysis tool is multiple regression test supported by SPSS version 16.0.

Based on an analysis knowable pattern parents applied to students in MI Miftahul Ulum Payaman Village Solokuro Subdistrict Lamongan District is the pattern democratic with prosentase of 62.5 %.. Students' emotional intelligence at MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District is in the high category as shown by 7 students or 17.5 %, while 26 students or 65 % are showing emotional intelligence in the medium category, and 7 students or 17.5 % are indicating emotional intelligence in low category. It means that most students at MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District have medium emotional intelligence. Correlation of the results shows that the pattern of foster (democratic, authoritarian, permissive) had a significant positive influence. and it is then explained that F-table value with df_1 and df_2 of 36 is 2.84 for 5 % rate, but it is 4.31 for 1% rate. Therefore, F-count (26.115) is higher than F-table (2.84 and 4.31). H_a is accepted, but H_o is rejected. It is determined then that care pattern (authoritarian, democratic, and permissive) is influencing the child's emotional intelligence of MI Mitfahul Ulum, Payaman Village, Solokuro Subdistrict, Lamongan District, meaning that higher parental care pattern will produce higher emotional intelligence.
