ABSTRACT

Nuruzzakiah, Reni. 2012. Parents Communication Relations Against Student Class XI Confidence in SMK PGRI 1 Ngawi. Thesis Faculty of Psychology UIN Maulana Malik Ibrahim Malang.

Advisor: Dra. Siti Mahmudah, M.Si

Keywords: Parental Communication, Self Confidence.

In everyday life we realize it or not the communication is part of human life. in families, Communication of parents and children is very important for the development of the child's personality. Every parent hope they son would become "a people". Many supporters of the nature of progress must be nurtured from an early age. One of them is the confidence (self confidence). Parents are responsible to meet the needs of children in order to develop the whole existence of the child, these needs include the needs of biological and the need of psychological such as security, loved, understood as a child, so children can grow and develop in the direction of harmony. But many found in everyday life the lack of communication between parents and children, so children feel less confident. Communicating with children is one of the most effective way to avoid things that are not desirable. Of course, here the communication must be bi-directional, meaning that both sides are listening to the views of each other. With communication, parents can find out the views and frame his thinking, and vice versa child can also find out what is desired by the parents.

The purpose of this research is to find the level of parent communication and self-confidence of students in class XI SMK PGRI 1 Ngawi. In addition, this study also examined the association of parents of communication confidence XI grade students at SMK PGRI 1 Ngawi.

This type of research uses a quantitative approach. The experiment was conducted at SMK PGRI 1 Ngawi, with a population of 75 students, supporting data in this study were obtained through observation, interviews, documentation and questionnaires. There are two scales used, namely the scale of 40 aitem parent communication and self-confidence 32 aitem. Methods of data analysis was done by using Pearson Product Moment correlation using SPSS 16.0 for windows.

From the analysis note that from 75 students, 13 students have a high level of communication with the percentage of 17%, with a 51 percent rate was 68% and 11 lower rate with the percentage of 15%. For the confidence level of 17 percent of students with high levels of 23%, 45 students were level with the percentage of 60% and 13 students with a low percentage of 17%. Based on the results of data analysis using the product moment correlation r calculated results obtained 0.637 and 0.000 r table. This suggests that there is a significant positive relationship.
