

ABSTRACT

Izzah. Shohifatul, 2012, The Difference on Self-efficacy Level Among Students of Faculty of Psychology and Science and Technology UIN Malang, Thesis, Faculty of Psychology, State Islamic University of Malang. Advisor: M. Jamaluddin Ma'mun, M.Si

Key words: Self-efficacy

Bandura (1994) explained that Self-efficacy is the confidence or belief belongs to people on their capabilities to improve the quality of life. Self-efficacy can be a person's feelings, ways of thinking, self motivation and the desire of belonging to something. People with high self-efficacy are able to approach difficult tasks as challenges to be mastered rather than as a threat to be avoided, and on the other hand, people with low self-efficacy, they will run away from difficult tasks and assume them as personal threat. Self-efficacy is very prominent for every individual as well as for students, because self-efficacy encourages ones to try harder to overcome all difficulties and makes all the impossible becomes possible. This study aims to determine: (1) the level of students' self-efficacy in Faculty of Psychology (2) level of Students' self-efficacy in Faculty of Science and Technology, IT department (3) differences on the level of students' self-efficacy in faculty of psychology and science and technology, IT department.

This study is a quantitative study using comparative methods approach. The sample in this study is 42 generation-2009-students of psychology faculty and 52 generation-2009-students of science and technology-IT department 2009. The sampling technique used is purposive sampling, instrument used in this study is self-efficacy questionnaire. To test the validity is using Product Moment formula and to test the reliability is using Cronbach's Alpha formula and SPSS 16 program *for windows*.

Based on the results of this research, the level of students' self-efficacy of faculty of Psychology and Science and Technology, IT Department is in the medium category with 61.9% percentage for psychology, as well as 76.9% for Science and Technology, the IT department. Based on the results of data analysis using the t-test, it is obtained that $T_{hit} = 613 < T_{tab} = 1.645$, T_{hit} is smaller than T_{tab} with $df = 92$, the value of $F = 2.275$ sign $(p) = 0.135$ with a significance level is 0.05. Then H_0 : accepted and H_a : rejected. It means that the hypothesis in this study is rejected. Thus, there is no difference in the level of students' self-efficacy between faculty of Psychology and Science and Technology 2009- IT department UIN Malang Maulana Malik Ibrahim.
