Tina, Riska Via Andis. 2012. Democratic Parenting Relationship whit Pro-Social Behavior Student of English Language and Literature Departement of UIN Maulana Malik Ibrahim Malang.

Supervisor : Dra. SitiMahmudah, M.Si

Key Words : Democratic Parenting and Pro-Social Behavior

Family is the first granary of knowledge to every human being, for the first time, people start having interaction is with the family including the father, mother, grandfather, grandmother, and others. Therefore the family as the foundation for each individual interact experiences. Parenting which is often used by parents is democratic parenting, where children are able to give his views on the family. The child who is nurture this type is capable of forming pro-social. Person who later having a pro-social attitude or pro-social behavior, will willingly help anyone who needs help.

This study aims to determine how the level of democratic parenting and pro-social behavior, and deter mine the relationship between democratic parenting and pro-social behavior Students English Language and Literature Departement. This research takes the subject of 70 respondents. This research uses quantitative research and data collection methods using questionnaires.

Based on the results of this research is that the level of democratic parenting Student Programs UIN MALIKI BSI with the highest score as many as 48 student or 68% in the low category. The lowest score obtained by 2 student or 2% in the high category. In the categories were obtained by 20 student or 28%. Levels of pro-social behavior Students majoring BSI MALIKI UIN obtained a total of 39 student or 55.7% were in the low category. 21 student or 30% were in the high category. 10 student or 14.3% were category spring. It is based in the value r_{hit} 0.521. From the table above it can be seen that the value of N is 70 and the value r_{tabel} is 0.000. Said to be significant or a related counts if r is greater than r_{tabel} . With a significance level of 5% of the count r correlation results above have values r_{hit} 0.521 > 0.000 r_{tabel} value,

means that H_0 is rejected and H_a accepted. The higher the level of democratic parenting, the higher the level of student's pro-social behavior.
