

ABSTRACT

Muhazir, 12780004, MARRIAGE CEREMONY OUT OF RELIGIOUS AFFAIRS OFFICE: (Study of Marry Registrar Employee view and Society of Malang) ", Department of Al-Al-Syakhsyiyah ahwal Graduate State Islamic University Maulana Malik Ibrahim of Malang, Dr. H. Saifullah, M.Hum. Dr. Hj. Mufidah Ch. M.Ag.

Keywords: marriage ceremony, Marry Registrar Employees (VAT).

The majority of people of Malang prefer to choose the marriage ceremony implementation outside of KUA than in KUA itself. It can be seen from the data that show that the marriage ceremony is mostly done outside the KUA. In 2012 the number of marriage ceremony implementation is outside of KUA in the entire KUA of Malang reach 5736 of 6384 marriages mean the number of marriages conducted in KUA as much as 648 times. In 2013 the number of marriages are 5750 which married in KUA as many as 642 and outside of KUA as many as 3952.

In this study, there are two important things researched are about factors that cause people prefer marriage ceremony outside of KUA, whereas in PMA No. 1 Year 2007 on Registration of Marriage Article 21 paragraph 1 explains that the marriage ceremony is done at KUA, although there are other alternative namely the marriage ceremony may be performed outside of KUA if there is consent from the VAT and then the important thing in this study is to explore the public and VAT opinion related to the implementation practices marriage ceremony outside of KUA.

The research type of this research study that used more referring to the field research type (field research). This is caused that research is more emphasis on field data as the object of study, according to research that will be studied is related about the marriage ceremony practice conducted outside of KUA. In this study, the researcher describes about the object studied by recording all things

related to the object to be studied. The type of data collection used is interviewing and observing then it will be classified and investigated.

The results of this study indicate that: (1) The majority of people prefer to hold the marriage ceremony outside of KUA. It is influenced by cultural factors, factors ease of implementation as well as to avoid prejudices of society. So many people prefer to conduct the marriage ceremony outside of KUA than in KUA. (2) PMA No. 11 Year 2007 on Registration of marriage on one hand, set about marriage ceremony implementation in KUA. However, this provision is perceived by the VAT that is still none the less related to the marriage ceremony implementation outside of KUA. in this rule also does not explain the associated operational costs outside of KUA and outside working time, so the VAT still feel worried if serving outside of KUA and working time. This problem is also related to the lack of clarity from government related to the limit of gratification, because of the practice giving alms is considered as a gratification form by some law enforcement while according to the people this is a tradition and in Islam also recommended for giving alms.
