In globalization era, the futures market is believed to be increasingly important to encourage economic growth. Many facilities are offered by the Brokers for their clients, One of facilities is PAMM Account. PAMM account is a system of cooperation between Investors and Traders Manager, which investors invest into the Account Manager for capital Trading Forex. If the Manager Trader gets profit, the investor will also automatically profit. Trading forex has got sertificate of halal by MUI, but the problem is, whether the system of cooperation (PAMM) is halal? This is one of the factors the researcher to do research on the law of the PAMM Account.

In this research, there are two research problems: 1) How is the perspektive of fatwa No:08/DSN-MUI/IV/2000 about Musyarakah financing through the cooperation of PAMM Account in Forex Trading?. The researcher employs normative research. This research is a library research. and uses the conceptual approach.

The findings, every clients who already have a Real Account can be a PAMM-Investor or PAMM-maneger. Client will be offered for registration in the PAMM system including the acceptance of agreement in the use of PAMM-system services. Musyarakah al-'inan is the suit covenant PAMM Account cooperation, because the system is very similar cooperation. In this agreement, the contract which is used that contract with the writing and Akad successor agreement have been stated in the PAMM agreement. The target of law is firtual money, which is used for capital is USD. Every profits should be distributed proportionally according to the number of each saham, and the loss should be divided among the partners proportionally according to each saham in the capital.
