Keywords : Social Adjustment , Delinquency Students

Social adjustment occurs within the scope of social relations where people live and interact with others . These relationships include relationships with the surrounding community homes , family , school , friends or the public in general . The next process is to be carried out in the social adjustment of the individual is the willingness to adhere to social norms and regulations . In the process of social adjustment , individuals begin to get acquainted with the rules and the regulations and obey so that it becomes part of the establishment on his social life and be a pattern of group behavior .

This study uses a quantitative correlation . The study sample as many as 32 students MA Muhammadiyah 2 Kedungkandang Malang . Data retrieval using an attitude scale . Processing using the product moment correlation of Carl Pearson , and test the validity and reliability using Cronbach alpha formula. Processing of the data is processed using SPSS 17 for windows.

Based on the analysis of the research, the Social Adjustment average student is in a category lower percentage of 43.75 % of the 14 subjects with 10 subjects (31.25 % ) is at a high level of social adjustment , 8 subjects ( 25 % ) were in the medium category . While the student Delinquency obtained results in general are in the category of being 46.9 % of the 15 subjects , 13 subjects ( 40.6 % ) are at a high level of student misbehavior , and 4 subjects ( 12.5 % ) are at the level of student misbehavior which is quite low. Relationship with the social adjustment of students delinquency MA Muhammadiyah 2 Kedungkandang Malang obtained  $r_{hit} -0.686$  ,  $p = 0.000$  , where the significance level for the number of subjects was 32 people  $0,349 r_{hit} > r_{tabel}$  ( $p < 0,050$ ) ( $0,000 < 0,050$ ) for the significant level of 5 % , which means that the social adjustment of students with delinquency significant relationship with the opposite direction of the relationship , ie, if social adjustment, the higher the delinquency of students getting low, or vice versa.
