Key Words : Indonesian Workers, Divorce, Religious Court

Forming a happy and harmonious family is the purpose of a wedding. Marriage is a difference management, whoever is able to accept and understand the differences partner, then happiness and harmony is the result. But if someone is not able to accept and understand the difference, then, would lead to a divorce.

Many specific causes that can lead to a marriage can not be forwarded, as was the case in Kangean Islands reportedly Kangean Religious Courts since 2010 to 2013 the divorce rate in Kangean Islands experienced a significant escalation. In 2010 the number of divorces reached 464. Some 67 of them because there is no liability, third party interference 43, 40 because there is no harmony. In 2011 the divorce rate rose to 500. A total of 174 of them because there is no responsibility, 97 third-party interference, 101 because there is no harmony, etc. And divorce is increased to 2013. Divorces recorded in 2013 reached 512. Some 195 of whom have no responsibility, 114 third-party interference, 96 because there is no harmony.

Based on the facts, this thesis research examines the issue of what the background factors escalation divorce domestic Indonesian Labor (TKI). Then is there any influence of the number of people who become Kangean Island Indonesian Workers with divorce escalation Kangean Island.

This study includes a case study that aims to find an association of family members of Indonesian Workers (TKI) against the rising divorce rate. And this study used a qualitative approach that focuses its study on the phenomenon of Indonesian Workers (TKI) in triggering the rising number of divorces that occur in the Religious Kangean. While the fact retrieved by using interviews with judges and family workers. Furthermore, the data is processed and sorted out and then analyzed using qualitative descriptive methods.

The number of heads of families into Indonesian Manpower result of sexual needs neglected. Sexual needs that is the major factor in the divorce. While that makes people become Labor Kangean Islands Indonesia because of economic.
