ABSTRAK

Ulva Novia, Safika. 2015. Penerapan Pendidikan Islam di SMPIT Al-Ghozali Jember. Skripsi, Jurusan Pendidikan Agama Islam, Fakultas Ilmu Tarbiyah dan Keguruan, Universitas Islam Negeri (UIN) Maulana Malik Ibrahim Malang. Pembimbing Skripsi: Dr. Abdul Malik Karim Amrullah, M.Pd.I

Pendidikan Islam merupakan upaya yang dilakukan untuk mempersiapkan peserta didik untuk menjalankan tujuan diciptakannya manusia, yaitu menjadi khalifah dan hamba Allah. Al-Qur'an dan Hadits merupakan landasan utama dalam pendidikan Islam ini, karena dengan menjadikan Al-Qur'an dan Hadits sebagai pedoman hidup, maka peserta didik dapat mengetahui mengapa manusia diciptakan. Tujuan dari pendidikan Islam itu sendiri adalah untuk mencapai keseimbangan antara jiwa, akal pikiran, dan jasmani. Untuk mencapai tujuan pembentukan khalifah dan hamba Allah yang memiliki keseimbangan antara jiwa, akal pikiran, dan jasmani, maka diperlukan upaya penerapan pendidikan Islam kepada peserta didik.

Tujuan penelitian ini adalah untuk: 1) mendeskripsikan konsep pendidikan Islam yang dikembangkan di SMPIT Al-Ghozali Jember, 2) mendeskripsikan penerapan pendidikan Islam melalui aktivitas, budaya, dan lingkungan sehari-hari di SMPIT Al-Ghozali Jember, 3) mendeskripsikan evaluasi pendidikan Islam di SMPIT Al-Ghozali Jember.

Untuk mencapai tujuan di atas, digunakan pendekatan penelitian kualitatif dengan metode studi kasus. Instrumen kunci adalah peneliti sendiri, dan teknik yang pengumpulan data yang digunakan adalah observasi, wawancara, dan dokumentasi. Data dianalisis dengan cara mereduksi data, verifikasi, pemaparan data dan menarik kesimpulan. Dengan demikian, secara umum penelitian ini dilakukan dengan proses perencanaan, pengumpulan data, analisis data, dan triangulasi.

Hasil penelitian menunjukkan bahwa, 1) konsep pendidikan Islam yang diterapkan di SMPIT Al-Ghozali Jember dengan merumuskan tiga aspek, yaitu tilawah, tazkiyah, dan ta'limah dan menjadikan asrama sebagai media pengembangan peserta didik agar lebih maksimal, sehingga terbentuknya sikap *hablumminallah*, *hablumminannas*, dapat menjaga kebersihan dan kerapian, menjadi teladan yang baik, disiplin, dan fokus dalam pembelajaran, 2) penerapan pendidikan Islam melalui aktivitas, budaya, dan lingkungan sehari-hari di SMPIT Al-Ghozali Jember dengan pembiasaan sholat fardhu berjamaah, sholat sunnah, puasa, dzikir bersama. Selain itu, terdapat program wajib menghafal Al-Qur'an, mentoring, serta pembelajaran pendidikan Islam di sekolah dan asrama, 3) proses evaluasi pendidikan islam di SMPIT Al-Ghozali Jember menggunakan evaluasi harian, evaluasi bulanan, dan evaluasi per tiga bulan untuk pembelajaran Al-Qur'an.

CHAPTER I

INTRODUCTION

A. The Context of Study

Many creation of Allah, but only one class creation of Allah who is perfect, have an intelligence, attitude and knowledge, sublime more than another beings, that is human being. Human being as creation of Allah has an aim on what they were created as stated in Quraan suraah Adh-Dhariyat verse 56,

وَمَا خَلَقْتُ الْجِنَّ وَالْإِنْسَ إِلَّا لِيَعْبُدُونِ ﴿٥٦﴾

(Wamaa kholaqtu aljinna wal insa illaa liya'buduuni)

I have only created Jinn and men, that they may serve me.¹

In this case is clear that human being created to serve Allah. Their ways in serve Allah are obeying His command and avoiding the forbiddens. Human as sublimes beings, given the potential and skill to developed, that is based of morality to implements the function and the aims of Allah. So need to developed and guided through education.²

At this moment, Islamic education is a lesson in formal school and discussion about the theory of Islamic values like *Akidah Akhlak*, *Fikih*, Quraan Hadits, and Islamic History. There is no more application for reflect Islamic education's purpose. This case appears many problems, social aspect, politic, culture, economy, etc. Even though, the intellectual achievement increased in

¹ Mushaf Al-Qur'an Terjemah,. page 523

² Muhmidayeli,. *Teori-teori Pengembangan Sumber Daya Manusia dalam Pendidikan*,. (Bandung:Refika Aditama, 2014). page 35

International of science olympiad, but decrease in another aspect, important aspect, that is morality.³

Morality is humanity symbol, because they are created for that. Psychological potential as intelligence, passion, desire and feeling guided to imagine, creativity and make a change they life to high morality.⁴

In Islam, what the aim of human created is the purpose of education. Ahmad tafsir says, education is effort that do by someone (educator) for someone (student) to maximum development positively.⁵ This is a challenge of Islamic education, make Islamic education not only a lesson in school otherwise implemented in student's life, can be formed and habited in boarding school.

The term of Islamic education described as guidance or help given to student by adult people for maturity developments. Education is an effort done by someone or groups to influence in maturity or mental achievement. So, education is adult people's effort for children to guide soul, body and spiritual development for the maturity.⁶

Education is not effective if doing by parents, that's why school needed for the next education after family. Boarding school is one of school's program which has curriculum integrated by school's curriculum to helps parents as effectiveness place for formed and habited the implementation of Islamic education value.

The concept of education which are offered to solve the individual character and the character of the nation, it is only Islamic education that could guide human to the sacred way by being able to understand the natural tendency as one of The One Almighty God creation. While based on the vice of headmaster of Integrated Islamic Junior High School Al-Ghozali Jember, Islamic education is one of the solution that could be implemented to guide human in restoring moral and manner. This is inspired from the educational pattern which was conducted by Rasulullah SAW when he educated his companion so he could create the grates generation of all mankind. Islamic Education process is based on QS. Al-Jum'ah verses 2-3:

هُوَ الَّذِي بَعَثَ فِي الْأُمِّيِّينَ رَسُولًا مِّنْهُمْ يَتْلُو عَلَيْهِمْ آيَاتِهِ وَيُزَكِّيهِمْ وَيُعَلِّمُهُمُ
الْكِتَابَ وَالْحِكْمَةَ وَإِنْ كَانُوا مِنْ قَبْلُ لَفِي ضَلَالٍ مُّبِينٍ ﴿٢﴾ وَآخَرِينَ مِنْهُمْ لَمَّا
يَلْحَقُوا بِهِمْ وَهُوَ الْعَزِيزُ الْحَكِيمُ ﴿٣﴾

(Huwa alladzii ba'asa fii al ,ummiyyiina rosuulan mminhum yatluu 'alaihim ,aayaatihii wa yuzakkiihim wa yu'allimuhumu alkitaaba walhikmata wa in kaanuu min qoblu lafii zholaalin mmubiinin. Wa,aakhoriina minhum lammaa yalhakuu bihim, wahuwa al'aziizu alhakiimu)

It is He who has sent among the unlettered a Messenger for themselves reciting to them His verses and purifying them and teaching them the Book and wisdom –although they were before in clear error. And (to) others of them who have not yet joined them. And He is the Exalted in Might, the Wise.⁷

So, Islamic Education consists of three phases:

⁷ Mushaf Al-Qur'an Terjemah. page 553

a. *Tilawah*. It is the process to guide students to know and remembers Allah through His “verses” or “signs” in Quraan, universe, or themselves. From this process, it is expected to be able to regain the consciousness of tawheed which is inferred in *laa ilaha illallaha* which make the Quraan as guide of life.

b. *Tazkiyah*. The root of this word means “grow, develop, and clean”. This means that by knowing Allah, somebody could be purified from many sins that could ruin themselves and at the same time develop their good potentials. This human would be a well mannered human or *insan adabi*.

c. *Ta’limah*. The principle of this phase is a process of gaining knowledge, that is a process to create a rational foundation on what to believe, what to do, and what to plan by teaching the values of Qur’an and Sunnah.

What have been explained above interest the writer to conduct a research on those factors, so the title of this research is “THE IMPLEMENTATION OF ISLAMIC EDUCATION IN INTEGRATED ISLAMIC JUNIOR HIGH SCHOOL AL-GHOZALI JEMBER”.

B. The Focus of Study

Based on the context of study, the author could identify the focus of study this research:

1. How is the concept of Islamic education which developed in Integrated Islamic Junior High School Al-Ghozali Jember?

2. How is the implementation of Islamic education through activities, culture, and daily environment in Integrated Islamic Junior High School Al-Ghozali Jember?
3. How is the evaluation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember?

C. The Objectives of Study

Based on the problem identification above, we could arrange the purpose of research, are follows:

1. To describe the concept of Islamic education that developed in Integrated Islamic Junior High School Al-Ghozali Jember.
2. To describe the implementation of Islamic education through the activities, culture, and daily environment in Integrated Islamic Junior High School Al-Ghozali Jember.
3. To explain the evaluation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember.

D. The Significances of Study

This research is expected to give constructive contribution to education institution. The detailed explanation of the usefulness of this research is as follows:

1. Learning Institution

The result of this research is expected to give a positive contribution as well as the consideration for learning institution in Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember. This research could

be one of the media which is used as reference in the implementation of Islamic education.

2. Ministry of Education Affair

This research is expected to give information to the administration of national education especially to ministry of religious affair. It is related to its function to realize Indonesian as a whole human being which is stated in Indonesia's regulation no. 20 in 2003, chapter II, act 3, stating that a whole human being of Indonesia is a human who holds faith and piety to the One Almighty God, noble, healthy, knowledgeable, skillful, creative, independent, democratic, and responsible. So it could be known in which part the strength and weakness of education institution is in order to develop IQ, EQ, SQ. Moreover, it could be known about how to implementation of Islamic education in boarding school for girl which is already available in Indonesia. So it could become an evaluation material and consideration for further regulation.

3. Development of Scientific Treasures

This research could contribute to the process of implementation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember as one of a method to realize a human which holds faith and piety toward The One Almighty God. Furthermore, it could be one of reference for further research.

4. Society

As one reference and consideration in implementing process of Islamic education for the people in Jember city and as a document which could increase and complete scientific treasure.

5. Researcher

To improve knowledge about Islamic education in boarding school and teaching moral to faith increase.

E. The Limitation of Study

The study of Islamic education is a vast study. In that case, to avoid misunderstanding this research is limited to:

1. The Concept of Islamic education which is developed by Integrated Islamic Junior High School Al-Ghozali Jember.
2. The Implementation of Islamic education in activities, culture, and daily environment in Integrated Islamic Junior High School Al-Ghozali Jember.
3. The Evaluation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember.

F. The Term of Study

To facilitate understanding and clarity about the direction of the writing of this thesis, the author lays out the definition provided in the title of the writing of this, namely:

Implementation is carry out a plan or idea; the application of.⁸

⁸ Tim Penyusunan Kamus Pusat Bahasa, KBBI. (Jakarta: Balai Pustaka, 2003), page 427

Education is a conscious and well planned act to actualize learning environment and learning process so student could actively develop their potential in order to have religious spirituality, self-control, personality, intelligence, noble personality, and needed skill for themselves, society, and nation state.⁹ Islamic education according to Ahmad tafsir is effort do by someone (educator) for someone (student) to develop the capabilities.¹⁰

Boarding school is a school where some or all people study and live during the school year with their fellow student and possibly teachers and/or administrator. The word 'boarding' is used in the sense of 'bed and board,' i.e. lodging and meals. Some boarding school also have Particular day that students attend by day and return off-campus to their families in the evening.¹¹

G. The Previous of Study

The previous of study are, the implemetation of Islamic education to building attitude of student in Islamic boarding school Millinium Sidoarjo by Vivi Arinta that focus about the implemetation of Islamic education to building attitude of student. The other previous study is the application of Islamic education to building character of student, that focus about the application of Islamic education to building character of student, the efort that used PAI teacher to building characteristic of student, and the learning strategy/method by PAI teacher to building character of student. So, the previous conducted studies are as follows,

H. The Systematic Discussion

In this research, the writer classifies the discussion into six chapters. Where, chapter by chapter has very significant relationship in order to make this research discussion easier to be read and understood. The systematic discussion of this thesis as follow:

Chapter I is Introduction that includes: the context of study, the focus of study, the objectives of study, the significances of study, the term of study, the previous of study, and the systematic discussion.

Chapter II is study of literature that discuss about the definition of Islamic education, Basic and purpose of Islamic education, and the characteristic of Islamic education.

Chapter III is the method of research that discuss about the approach and the type of research, the site of research, the data and the source of data, data collection and instrument, data analysis, checking the validity of data, and stage of research.

Chapter IV is chapter that explains about data and research findings. In this chapter, it consists of research object description and research result explanation.

Chapter V is chapter about discussion, the researcher will analyze data and discuss that obtained from the experiment. It meant to interpret the data from research result.

Chapter VI is conclusion from all of discussion, both from the first, second, third, fourth, and fifth chapter. Thus in this sixth chapter, it contains of conclusion

BAB II

STUDY OF LITERATURES

A. The Islamic Education

1. The Definition of Education

Education refers to Indonesian word *didik* with prefix ‘*pe*’ and suffix ‘*kan*’ the meaning is act (thing, manner, etc). Education originated from Greece ‘*paedagogie*’ that is guiding who give to child. This term is translated into English “*education*” means developing or guiding. In Arabic this term usually translated with ‘*tarbiyah*’ it is mean education.¹

Education is a conscious and well planned act to actualize learning environment and learning process, so students could actively develop their potential in order to have religious spirituality, self-control, personality, intelligence, noble personality, and needed skill for themselves, society, and nation state.²

Thus, it could be concluded that the nature of education is human effort to help and guide their growth and development of *fitrah* (natural tendency of human) or potential in order to develop to the maximum point regarding of one’s ideal.

Education in Indonesia functions to develop skill, form well behaved character, and nation civilization which is noble in order to educate nation’s existence, which is functioned to develop the potential of the students to be able to become a religious and faithful individual of the Almighty God, having noble character, physically healthy, knowledgeable, skillful, creative, independent, and become a democratic as well as responsible citizen.³

2. The Definition of Islamic Education

Islamic education could be simply defined as a guidance process to develop and stabilize the ability of human being to understand The Oneones of Allah. According this matter, Hamdani stated that:

It is an earne and serious effort in developing. Leading, guiding mind, soul, qalbu, heart, and spirit to know (*Ma'rifat*) and love (*Mahabbah*) Allah. And eradicate all traits, *af'al*, name, and negative substance by replacing with the positive (*Fana'fillah*) and eternalizing it in a condition and space (*baqa'billah*).⁴

It is mean that human could function all instrumens which are given by Allah, brilliant mind to solve the secret of His creation, the heart to show the nature of the secrets, and beautiful physical condition by appearing His right.⁵

Islam, in 'Islamic education' show the identity of education, that is education based on Islam. According the educational figure, Zakiya Derajat in Abdul Madjid and Dian Andayani's books about "*pendidikan agama islam berbasis kompetensi*" said, Islamic education is the effort to build and guide the students to understanding Islamic values comprehensive, inspire the goal, and finally practice and make Islam as the way of life.⁶

Islamic education is education science based on Islam. Islam is the name of religion by prophet Muhammad SAW. Islam is teaching about human life. This teach formulated by Al-Qur'an, hadits and common science. So, Islamic education is education based on Al-Qur'an, hadits, and common science.⁷

⁷ Ahmad Tafsir, *Ilmu Pendidikan dalam Perspektif Islam*, (Bandung: PT. Remaja Rosdakarya, 2010), page 12

According An-Nahlawy in Ulil Amri Syafri's book, the characteristic of education based on Quraan is, Islamic education must have three aspect; *first*, personal education consist of faith to Allah and *akidah*. It is to prepare itself to receive Islamic values. *Second*, loving goodness and hold on the Islam principle every condition. *Third*, educational of social environment consist of loving the truth and practice, patient and hold on face the threat.⁸

By this Islamic education, human could be not just a meredehumanic human, but human as a servant of the God. Thus, affection, loving, giving for the needy, cautious of the deception of the worland and being oppressor could behave humbly (*zuhud*) and wara' could grow within one's heart.

B. The Foundation of Islamic Education

The fundamental of Isamic education is an Islamic way of life which is based on transcendentan and universal noble values from Al-Qur'an and Hadits.

Based on Islam, human being is creation of Allah who will be the leader on the world, like in Quraan suraah Al-Baqarah verse 30,

وَإِذْ قَالَ رَبُّكَ لِلْمَلٰٓئِكَةِ اِنِّىْ جَاعِلٌ فِى الْاَرْضِ خَلِيْفَةًۭ ۚ قَالُوْۤا اَتَجْعَلُ فِیْهَا مَنْ یُّفْسِدُ فِیْهَا وَیَسْفِكُ الدِّمَآءَ وَنُحْنُ نٰۤسِیۡحٌۭ بِحَمْدِكَ وَنُقَدِّسُ لَكَ ۗ قَالَ اِنِّىْۤ اَعْلَمُ مَا لَا تَعْلَمُوْنَ ﴿۳۰﴾

(Wa idz qoola robbuka lilmalaa,ikati innii jaa'ilun fi al,ardli kholiifatan, qooluu ,ataj'alu fiihaa man yufsidu fiihaa wa yasfiku addimaa,a wa nahnu nusabbihu bihamdika wa nuqoddisu laka, qoola innii ,a'lamu maa laa ta'lamuuna)

⁸ Ulil Amri Syafri, *Op, cit.*, Hal. 36

Behold, thy Lord said to the angels: "I will create a vicegerent on earth. "They said:"Wilt Thou place therein one who will make mischief therein and shed blood?-whilst we do celebrate Thy praises and glorify Thy holy (name)? "He said."I know what ye know not".⁹

In this verse explained that "...I know what ye know not", it is mean, Me (Allah) know that the aim of human being created has a bigger goodness more than it is damage.¹⁰ Knowledge of the aim of human being creation is important to arrange the goal of education for human being.¹¹

After knowing about the essential of human being created, author arranged the goal of Islamic education for human being. Islam wants to educate human being so able to realize the goal of their life as commanded by Allah. The goal of human being creation based on Qur'an is serve Allah. It known from suraah Adh-Dhariyat verse 56,¹²

وَمَا خَلَقْتُ الْجِنَّ وَالْإِنْسَ إِلَّا لِيَعْبُدُونِ ﴿٥٦﴾

(Wamaa kholaqtu aljinna wal insa illaa liya'buduuni)

I have only created Jin and men, that they may serve Me.

The meaning of this verse is Allah create their servant to serve Him. Nothing the allies, Whoever doing His command, Allah will give a perfect reply. Whoever disobeyed of Him, Allah will give a torment seriously.¹³

The aim of education is more important than facilities. The facilities of education must change but the aim of education is not change.¹⁴

Hadits is the second foundation after Quraan. Hadits contains instruction to guide human and to build human a whole or a mosleem who hold faith againts Allah. This is the purpose of education proclaimed in Islam.

In the history of Islamic education, The Prophet Muhammad had given a complete set of education in houses and mosques. One of this companion's house was Arqam bin Abi Arqam's house in Mecca, while the mosque which was used as a place to learn Islam was Nabawi Mosque in Medina.

The learning activities conducted by The Prophet Muhammad and continued by His companion was a realization of his sunnah. The hadits corelation with Islamic education is:

From Abu Huraira, Rasulullah said that "no one except a child is born in state of fitrah (sacred), then the parent who make him jews, Christian, and Zoroastrian".¹⁵ (HR. Muslim)

C. The Purpose of Islamic Education

An effort or activities should set an aim so that it could be managed to get expected achievements, and so does with education. An effort without a aim is meaningless. The meaning of aim based on Zakiyah Daradjat is "an expected achievement after efforts or activities was complete".¹⁶

If education is regarded as an effort through gradual step by step process, the process will end when the final objective of the education has been

¹⁴ *Ibid.*, page 12

¹⁵ Muslim, *Shahih Muslim*, Juz II, (Bairut: Darul Kutub, Al-Alamiyah, tt), page 48

accomplished. However, the purpose of education is not a static object, but it is a whole characteristic of a person regarding all aspect of his life.

General purpose of education based on Hasan Langgulung is desire and attempted changes by the educator to achieve.¹⁷ If this opinion is analyzed, the main purpose of education is a clearly communicated purpose of study, including behavior and specific conditions which usually occurs during the learning process. While the purpose of education which is stated in Regulations No. 20 in 2003 article:

The function of education in Indonesia is to develop skill, form well behaved character, and nation civilization which is noble in order to educate nation's existence, which is functioned to develop the potential of the student to be able to become a religious and faithful individual knowledgeable, skillful, creative, independent, and become a democratic as well as responsible citizen.¹⁸

The purpose of education based on UU (Regulation) of education essentially is a manifestation of ideal values formed inside desired human person, which affects and implicates in outward behavior. The purpose of education based on Al-Ghazali, as quoted by Abidin Ibnu Rusd is:

Education within it is process should be aimed to submit oneself to Allah and human perfection, guide man to achieve one's life purpose which is blissfulness in life and hereafter, because the truly result of knowledge is to submit oneself fully to Allah, The God of Universe.¹⁹

While based on Abdul Fattah Jalah, the purpose of education is:

To create human being as a humble to serve Allah. Thus, an education should covers all aspect of human being, to be a human who devote oneself to Allah, what it means by devoting oneself is to worship Allah.²⁰

¹⁷ Hasan Langgulung, *Manusia dan Pendidikan: Suatu Analisa Psikologi, Filsafat dan Pendidikan*, (Jakarta: Pustaka Al-Husna, 1986), page 59

¹⁸ Wina Sanjaya, *Kurikulum dan Pembelajaran*, (Jakarta: Kencana, 2010), page 154-155

¹⁹ Abidin Ibnu Rusd, *Op. cit.*, page 57

²⁰ Ahmad Tafsir, *Op. cit.*, page 46

The Purpose of education based on those three statements above, basically has one purpose regarding to an education based on Islam. In this matter, Islam requires human learners to be able to realize their purpose of life as outlined by Allah.

The purpose of human life in Islam is to devote oneself to God. Islamic education has an important contribution to achieve the purpose of Islamic education. Zainuddin stated that, the purpose of Islamic education result could be formulated as follows:

- a. The human could gain inner satisfaction, safety and happiness of living in this world as desired. With Islamic education embedded inside human soul, human will be able to follow Allah's order which can't be wrong so the purpose of desiring happiness could be achieved.
- b. The human could avoid the influence of misleading aqeedah (musyrik) which is merely the result of thought and culture.
- c. The human could avoid the influence of thoughts which fundamentally merely a theory of materialism such as capitalism, communism, colonialism, etc.

Thus, the purpose of Islamic education is inside every human's soul, so that it could be actualized in daily life. In other word, the purpose of Islamic education is essentially to create Muslim character.

D. The Componens of Islamic Education

1. Curriculum

Curriculum is one of componens of education. Curriculum is tools to achieve the aim of education, and the guidance of teaching and learning. Curriculum is dynamics, and curriculums are change according time, knowledge, student intelligence level, culture, and environment need.²¹

Curriculum is consisting about some learning study. Learning study is culture collection and positive experience to deliver for student, student must learn and understand all learning study, the learning study is teach in school and the aim of curriculum is get a diploma.

On learning about curriculum, show about some of concept of curriculum, that is follows²²:

- a. Ideal curriculum, which is expectation curriculum.
- b. Real curriculum or actual curriculum, that is real activity have do in teaching and learning process.
- c. Hidden curriculum, that is all about something which students positive affect when teaching and learning process.
- d. Curriculum and learning, curriculum show about the generally program and learning is reality.

²¹ Zainal Arifin., *Konsep dan model pengembangan kurikulum*,. (Bandung:Remaja Rosdakarya,2013) page 2

²² *Ibid.*, page 7

2. Teachers

The teacher is primary component of education, education is about teacher and student. Both of them have human interaction, that if the subject of education. In teaching and learning process, teacher is key to determine the learning quality, which is cognitive, affective, and psychomotor.

a. The meaning of teacher

Teacher is people which teach. Teacher is someone or else that give an affect for student treatment, so the student will be grow and get a potential development.²³

So, the teacher as people as teacher have explained in UU Sisdiknas No. 20 years 2003, teacher is professional human resource that have a job to planning, doing the teaching and learning process, scoring the result of teaching and learning, doing a guidance and treatment, and doing a research and environment devotion, especially for teacher and college.

b. Teacher competence

Teacher is human resource which prepared to professional teaching of student, so in nation educational system context, the teacher must have a competence to manifest the aim of nation educational system.

The competence of teacher appropriate UU Sisdiknas years 2003, it is follows²⁴:

²³ Fatah Yasin,. *Dimensi-dimensi Pendidikan*,. (UIN Malang Press, 2008) page 68

²⁴ *Ibid.*, page 73-77

1. Pedagogy competence

Pedagogy competence is teacher competence to manage the student teaching and learning.

2. Professional competence

Professional competence is teacher competence to understand the material of teaching and learning deeply.

3. Personality competence

Personality competence is competence that has in teacher characteristic, that are stable, maturity, and good role model for student.

c. Task and the responsibility of teacher

Djamarah (2003: 43-48) explain about the task and responsibility of teacher, that is follows²⁵:

1. Corrector, teachers can differences about true values and bad values. The correction can do comprehensive begin affective until psychomotor.
2. Inspiratory, the teacher must be a inspiratory/figure for student learning, the guidance of good learning, and solve a problems.
3. Informatory, the teacher must give information about science development and technology.
4. Organizer, the teacher must have a competence to manage the academic activity.

²⁵ A. Fatah Yasin., *Dimensi-dimensi Pendidikan Islam*,. (UIN Malang Press, 2008) page 82

5. Motivator, the teacher must have a competence to support the student for active learning.
6. Initiator, the teacher must have a good idea for education and learning.
7. Facilitator, the teachers give a facility for easy learning.
8. Guide, the teacher must have a competence to guiding the student.
9. Demonstrator, the teacher can demonstrate the material of learning.
10. Management of class, the teacher must have a competence to manage a class.
11. Mediator, the teacher must have a competence to be a functional media as communication tools for interactive process.
12. Supervisor, the teacher must have a competence to critic scoring about learning process.
13. Evaluator, the teacher must be a good evaluator.

3. Cost and tools

School is need a cost, this cost for procurement tools, the salary of teacher and employee, and tool maintenance. For institution that has a school, infestation in education has another meaning. With education, the institution can disseminate idea as a true, can educate the agent of organization.

Muslim in Indonesia generally, have a *dakwah* program, to disseminate Islam. School is *dakwah* media. To increase the quality of school need a term, this are follows²⁶: first, understanding an educational modern theory,

²⁶ Ahmad Tafsir,. Page 98

that is Islamic theory. The second is the availability cost. One of source of availability of cost for Islamic education is *wakaf*, *wakaf* is come from *amal* of treasure result. For generally meaning, the tools of education are all of that used teacher and student in learning process. Like school building, laboratory tools, curriculum, method, and educational administration.²⁷

School building has great learning rooms, give an opportunity for student to learn better. The kind of tools in all school is same, the differences is the aim of curriculum addition.

E. The Important of Islamic Education

The Islamic education is the thing that is most fundamental and primary in Islam. However still many among the public who have yet to understand, understand and appreciate will actually meaning and the fact of the Islamic education required, so there are not a few in meaning. Muslims should understand and understand brochures under the Prophet peace is upon him.

The experience of unity is a sacred experience. This experience in human life will be a source of inspiration for the life of the soul and the education of humanity. This is due to Islamic education will educate the human spirit for sincere in his entire life living only to Allah. The purpose of life is God and God's means, the expectation is that it will eventually bring the consequences of the construction of great character and be a holy man, honest, and firmly hold the mandate of God.

²⁷ Ahmad Tafsir,. Page 90

Islamic education of unity is very important because it has relevance to the concept of monotheism itself. According to Jalaluddin, teaching monotheism became more important because several things, among others:

- a. The unity underlying all human thought about the world
- b. Automatically, the conceptualization of unity implies a concept of shirk which have actualization-implication-social implications
- c. Unity is the conception of Islam that could be disputed with secularism, humanism or existentialism.

The second position, human will lose his true identity as *ahsani taqwim*. Therefore, the reconstruction of a human must always be supported and this is a requirement by doing internalization, familiarize and transformation values of the highest divine unity through education.

The importance of the education of unity, according to Mar'ie Muhammad, caused unity has relevance in everyday life of people living.²⁸ Witness the man has achieved progress in various fields of science and technology of materials, amazing, but mankind is experiencing chronic mental illness and serious the grip of life lost. The human race seems to have experienced what is called a vacuum. Losing grip live cause of human race does not have a direction and do not know for what life in this mortal world. Surely a misnomer even a

²⁸ Mar'ie Muhammad, *. Dengan Tauhid Kita Bangun Masyarakat yang Hanif.*, (Jakarta: Al-Azhar, 1996), page 10

tragedy, if mental illness and spiritually dangerous to infect those who declare themselves muslim.²⁹

Human that lost hand in spite of human life in the material but languished in mental and spritual. Mankind will easily mired in behaviour which is not face humanistic values, even they can behave destroy human values. This is when the left then in turn will destroy the civilization of mankind.

Whereas the purpose of human life is simply to serve God. Served here has a broad meaning, not limited to running the Islam values. This means running all commands and prohibitions of God consistently with full sincerity. Thus education of unity so important for human beings as well as the importance of the position and function of monotheism in Islam itself. So the influence of the unity of human life. Those who refuse will be live Dolors of monotheism in the world and the hereafter. Therefore education should be done as early as possible of unity, because every child has a God since before he was born in the world. Children should be build up to tawheed development, so more perfect and become a man of unity who truly love God above all else.³⁰

F. The Model of Islamic education in Integrated Islamic School

Integrated Islamic School is school that implement the concept of Islamic education based on Al-Qur'an and As Sunnah. Integrated term in Integrated Islamic School is *taukid* (amplifier) from Islam. The meaning is Islam that comprehensive, and integral.

²⁹ Ibid., page 11

³⁰ Ibid., page 11

Integrated Islamic School combining the method of learning, alignment expect the development of learning process that varieties. Integrated Islamic School is Islamic School that integrative organize between values and Islamic teaching with curriculum, used effective learning and cooperative between teacher, parents, and environment.³¹

1. The Characteristic of Islamic education of Integrated Islamic School

The Islamic education in Integrated Islamic School has a characteristic, which are follows³²:

- a. Islam is Philosophy foundation
- b. Integration of Islamic values in curriculum
- c. Apply and develop learning method to achieve optimization teaching and learning process
- d. Priority is *Qudwah Hasanah* (good model) to build the student
- e. Habit a *solih* (good) environment in school
- f. Involve the parents and community to support the achieve of Islamic education goals.
- g. Give priority to *ukhuwah* (relation) values in daily interaction
- h. Build a culture, cleanliness, neatness, and beauty.
- i. All of process in school activity is oriented by quality
- j. Build the professionalism culture in teacher and staff

2. The Strategy Concept

The strategy concept of Islamic education by Integrated Islamic School for teaching and learning that is follows³³:

- a. Apply *Robbaniyah* paradigm in learning
- b. Used mosque as the central of activity
- c. Formulate the programs of learning

Islamic education in Integrated Islamic School has a characteristic, strategy concept that different with other Islamic school. The operational principle of Integrated Islamic school is learning system that the student is central of Islamic education. Learning with doing, develop social competence, intuits development, imaginative, faith of Allah, problem solving agent, student creativity development, teamwork, and solidarity.³⁴

CHAPTER III

THE METHOD OF RESEARCH

A. The Approach and Type of Research

This study used a qualitative approach and descriptive analysis. According to Bogdan and Taylor, qualitative approach is research procedure that result descriptive data like words, and spoken from object and behavior of object.¹ This is because this study seeks describes reality and tried to describe a state and all its aspects in order to provide information to the researcher clearly.

The characteristic of the descriptive method are: *first*, to focus on solving the problem that exist in the present, in the actual problems. *Second*, the data collected initially arranged, describe and analysis (because this method is sometimes called the analytic method).² The type of research is case study, case study a study conducted intensive, detail and depth about organization, institution or certain symptoms.³

In this kind of research perspectives and approaches above, the tried to explain the reality of this implementation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember, covering concepts and value systems are developed, implementation of Islamic education in the daily activities, culture and environment in Integrated Islamic Junior High School Al-Ghozali Jember. The exposure data derived from interviews, documentation, field notes, field observations and others.

B. The Site of Research

Institute of Integrated Islamic Junior High School Al-Ghozali Jember addressed in Kaliurang 175, Tegalgede, Summersari, Jember. Postal 68121 with telephone number (0331) 326392.

C. Data and The Source of Data

Data is a something it takes as a support to solve the focus of research. The data of qualitative research is word, behavior, and the others are second data like document, etc. Words and behavior the object are observed or interviewed is a primary data and recorded by report or video/audio recorder, take a picture or film.⁴

The data in this study is a description, action, activity, behavior and notes that can be used as a basic study with regard to Islamic education implementation in Integrated Islamic Junior High School Al-Ghozali Jember.

The data source is the subject of where the data was obtained.⁵ Or subjects that could provide data in the form of word, actions and documents related to the research conducted. If research using questionnaires or interviews in data collection, the data source is called the respondent or informant, that is, those who respond or answer the research question, both written and oral questions. When researcher use observation techniques, it can be a source of data objects, motion or process anything. When using the technique of documentation data source is a document or records that already exist. Then the source data in qualitative research is the words or action, the rest is additional data in the form of documents

⁴ Nasution,., *Metode Penelitian Naturalistik Kualitatif*. (Bandung: Tarsito, 1998), Page 112

⁵ Suharsimi Arikunto, *Op, cit.* page 79

and others.⁶ Therefore, the type of data associated with this study is two kinds, namely:

1. Primary Data

Primary data is data based on information directly about a problem as a focus of research. This primary data is more used and one of qualitative research criteria. Data is found from open interview and depth with oriented on question list. According Moleong, words or spoken and human being behavior are primary data on research.⁷

Data obtained from the source directly, observed and recorded directly, such as interviews, observation, and documentation with the relevant parties, especially the head of Institution, the principal of school, the vice principal of curriculum, chief of boarding school, and student of Integrated Islamic Junior High School Al-Ghozali Jember.

2. Secondary Data

Secondary data is a data to complete primary data based on research activity. Secondary data is documents like notes. Moleong in his book about qualitative research method said that source of data and the other important source are written source like biography of school, profile, documents, archives, evaluation, daily report, etc. Beside of that, picture and statistical data include as a secondary data.⁸

That is data obtained from existing data and have studied the relationship problem that includes existing literature. The selection of informants in this

study conducted in a manner or snow sampling techniques, that is key informants will appoint someone who knows the issues that will be examined to complete the description, and the person appointed will appoint someone else if the information provided is inadequate.

D. Data Collection and Instrument

The collection of data is something that is very important in scientific research. Data collection is systematic and standard procedure to obtain the necessary data. In this study the method used in collecting the data is as follows:

1. Observation Method

Observation method is a method that using as observer and report systematically about phenomenon observed.⁹ The observation in this research is looking at event, movement or process.¹⁰

According Parsudi Suparlan in Hamid Patilima's book *Metode Penelitian Kualitatif*, observation of collecting data technique is require researcher include in social environment to look and understanding the phenomenon, appropriate with understanding meaning by citizen observed.¹¹

a. Participant observation and non-participant observation

According Lexy J. Moelong say, the position of researcher in qualitative research is planner, implementer, data collector, analysis, interpretation data and finally to report the result of research.¹²

⁹ Lexy J, Moelong. *Op, cit.* page 112

¹⁰ Suharsimi Arikunto. *Op, cit.* page 189

¹¹ Hamid Patilima, *Metode Penelitian Kualitatif*. (Bandung: Alfabeta, 2005). page 67

¹² Lexy J. Moelong,. *Op, cit.*, page 12

Participant observation is a process of inner observation made by the observer taking part in the lives of the people who will be observed. Observer act seriously as members of the group will be observed. In contrast, observers were simply doing pretending to participate in the life of the person who will be observed is called quasi participation. If observations do not participate in the life of the observed and the observer as a separate domicile, it is called non-participant observation. Things to note the observation, especially observation of participation are:

1. The recording must be done without the knowledge of the people who are being observed.
2. Observer must foster good relationships (Good Rapport).
3. Observation of systematic and non-systematic observations.

b. Systematic observation

Systematic observation is systematically organized to determine, the factors that will be observed by category complete. Conversely observations made without first preparing and limiting framework that will be observed is called non-systematic observation.

From the several ways the observation techniques, researcher used participant observation. This observation techniques used by the author to collect all the data related to the study. In case of this observation method is used to observe the term related to the study:

1. The location or place of Integrated Islamic Junior High School Al-Ghozali Jember.

2. The Actors involved of the Islamic education implementation in Integrated Islamic Junior High School Al-Ghozali Jember.
3. The activity of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember.

2. Interview Method

Interview method is a dialogue from interviewer to get information from interviewee.¹³ According Deddy Mulyana in his book *Metodologi Penelitian Kualitatif*, interview method is a technique to collect data and information. Interview is a form of communication between two persons or more, involve anyone who want get information from the others with giving a question based on special purpose.¹⁴

Interview activity more deeply if use interview guidelines with a list of question to ask the informant. The guidelines help interviewer, collecting data and information and then based on the improvisation researcher in object of research.¹⁵

a. In guided Interview

The interviewer is free to ask anything, but also considering the data that will be collected. In practice the interviewer does not bring guidelines what will be asked. The goodness of this method is that the respondents are not fully aware that they are being interviewed. Thus the atmosphere will be

¹⁵ Hamid Patilima. *Op, cit.* page 7

more relaxed because just a regular conversation. The weakness of this technique is the use of questioning sometimes less directions.

b. Guided Interview

Interview conducted by interviewers with a complete and detailed list of questions as defined in the structured interview.

c. Free guided interview

Free guided interview is combination of the free interview and guided interviews. From the three types, the authors use the free guided interview. Interview with the following considerations:

1. By the guide interview can be prepared in such a way that the necessary questions in order to review focuses only problem issues to be studied.
2. With the free interview is expected to create a more intimate feel of dialogue and open so it is expected that the data obtained is valid and profound. This method is used to obtain data on: how the implementation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember. These data were obtained by interview method, which in its implementation addressed to:
 - a. The headmaster of Integrated Islamic Junior High School Al-Ghozali Jember.
 - b. The vice headmaster of academic Integrated Islamic Junior High School Al-Ghozali Jember.

c. The chief of boarding in Integrated Islamic Junior High School Al-Ghozali Jember.

d. The student in Integrated Islamic Junior High School Al-Ghozali Jember.

3. Documentation Method

Documentation method is a method to looking for a variable data about notes, transcript, book, newspaper, magazine, *notulen*, meeting, *leger*, agenda.¹⁶

In this study the method of documentation used to obtain data relating to: a) a brief history of the founding of Integrated Islamic Junior High School Al-Ghozali Jember, b) vision and mission, c) organizational structure of Integrated Islamic Junior High School Al-Ghozali Jember, d) the state and students Integrated Islamic Junior High School Al-Ghozali Jember, f) State of infrastructure that support the implementation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember.

E. Data Analysis

Analysis data in this qualitative research will be done before observe, place of research, and after the collecting data. Nasution (1988) in Sugiyono's book *Metode Penelitian Kuantitatif, Kualitatif, dan R & D* say that analysis begin since arrange and explain the focus of research, before research until writing a result of research report.¹⁷

¹⁶ *Op, cit.* page 88

¹⁷ Sugiyono. *Metode Penelitian Kuantitatif, Kualitatif, R&D.* (Bandung: Alfabeta, 2011). Page 245

But the fact, analysis steps of qualitative data since of collecting data process and after finished collecting data. At the time of interview, the researcher has analysis to answer of interviewee. Miles and Huberman (1984), explained that activity in analysis of qualitative data have done interactive and continuously.¹⁸

In the qualitative assessment, the data obtain from various sources, using data collection techniques vary and performed continuously until data saturation. With the continuous observation of the resulting variation in the data is very high, so often have difficulty in doing the analysis.

According to Bagdan and Biklen in his book *Qualitative Research for Education: An Introduction to Theory and Methods*, as quoted by Prof. DR. Lexy J. Moelong, M.A:

Qualitative data analysis is the effort made by working with the data, organize data, sorting it into manageable units, synthesis, looking for and find patterns, discovering what is important and what is learned, and deciding what can be told to others.¹⁹

On the other hand, according to Seiddel cited by Moelong that qualitative data analysis process runs as follows.²⁰

- 1) Record the result court records, the case was given the source code so that the data can still be traced,
- 2) Collect, selecting classify, synthesis, making interview, and create the index,
- 3) Think, by way of making that category of data that has meaning, search for and find patterns and relationship, and make the findings public.

¹⁸ *Ibid*, page 246

¹⁹ Lexy J. Moelong, *Op, cit*, page 48

²⁰ Lexy J. Moelong, *Op, cit*, page 248

Once the data is collected, the next step is to analyze the data. Data analysis was performed at the time of data collection and after data collection. In this case the researcher used the descriptive research method.

According to Nana Sudjana, descriptive research is research that seeks to describe or depict an event, events that occur in the present.²¹ Within the meaning of descriptive research is the basis of data accumulated by means of purely descriptive, no need to search for or explained interconnected, testing hypotheses, make predictions, or gain meaning or engagement, although the study aimed to find things that can include a descriptive method. Research of this kind is called with research trying to find the actual information that is detailed by describing the symptoms of the existing, as well as trying to define the problem or get justified circumstance and practices that are taking place.²²

In the data analysis the researcher describes and elaborates on the implementation of Islamic Education in Integrated Islamic Junior High School Al-Ghozali Jember. In qualitative research data analysis performed during and after data collection. Therefore, the researcher have formulated:

a. Analysis during data collection

In this stage the researcher come to field to collect data from various sources. To facilitate to collecting data, the researcher establishes the following

²¹ Nana Sudjana, Ibrahim. *Penelitian dan Penelitian Pendidikan*. (Bandung: Sinar baru, 1989), page 64

²² Sumadi Suryabrata, *Metode Penelitian*. (Jakarta: PT Raja Grafindo, 1987) page 141

things: 1) Take note of the things that the principal only, 2) directing the focus of the research questions, 3) develop questions.

b. Analysis after data collection

Data collected when the field was obtained from interviews, documentation, and observation is still a disheveled data have not been systematically arranged or terms in this research is still in the form of raw data. In this stage of the analysis done by organize, sort the data into a pattern, categories, so we get a clear description, detailed and systematic.

And the more details the step used in analyzing research data have been obtained from various sources is not much different from the data analysis steps above, namely:

1. Record and analyze all result data obtained from various sources, from interviews, observation, and documentation.
2. Collecting, sorting, synthesizing, making overviews and classify the data according to the data needed to answer the problem formulation.
3. From the data that has been categorized, the researcher think to looking for meaning, relationship, and make general findings related to the formulation of the problem.

F. Checking the Validity of Data

In the qualitative research, commonly the terms of credibility, transferability, dependability, and conformability. Those terms are criteria that aimed to guarantee the trustworthiness (feasibility to be believed) for a research. Those

terms are summary from data validity checking steps, which is part that very important from qualitative research.²³

In order to make this research feasible to be believed (trustworthiness) and can be accounted, the researcher conducts data checking technique as follows:

1. Credibility criteria

The researcher as main instrument in this research played many roles in determining and justifying data, data source, conclusion, and other important things that have possibility to make prejudice or bias. To avoid those things, thus the obtained data is necessary to be tested is credibility.

To test data credibility in this research, the researcher uses triangulation. Triangulation in credibility test is refers to as a check of data from several sources manner and time. So, there are triangulation source, collect data technique and time.²⁴ Triangulation of data source conducted by comparing and checking the credibility of information both that obtained from one informant with the other informant. For example, compare the credibility data from current information that obtained from the guardian of Integrated Islamic Junior High School Al-Ghozali Jember.

2. Transferability criteria

In the transferability criteria, the researcher tries to report the research result in detail that especially express anything that necessary (related to the implementation of Islamic education in Integrated Islamic Junior High School

²³ Lexy J. Moelong, *Op, cit.* page 324-325

²⁴ *Ibid.*, page 273

Al-Ghozali) by the reader in order to make the obtained result can be understood by the reader holistically and comprehensively.

3. Dependability criteria

Dependability is criteria to assess the quality of research technique from its process side. The criteria used to keep the carefulness about missing possibility in conceptualization research plan, data collection, finding interpretation and report of research result. Thus, all of this can be accounted scientifically. Therefore, it is needed the dependent auditor as expert consultant in this research.

4. Conformability criteria

Conformability of certainty is necessary to know the objectivity of obtained data. It depends on the agreement from many people and the completeness of other supporting data to this research data. To determine data certainty, the researcher confirms the data with informants or other competent informant. The audit of this conformability conducted at the same time with dependability audit. The difference is on the assessment orientation. Conformability used to assess research result that supported by the existence material, especially related to the data explanation, research finding, and discussion of research result.

In order to get data conformability in this research, the researcher also complete the primary data with secondary data. Whereas, dependability audit

used to assess research process, start from data collection to the report that been well structured.²⁵

G. Stage of Research

To do qualitative research, the stages that must have by researcher to find a data by qualitative research process, according Moelong this stages is pre research, research, and post research.²⁶

1. Pre Phase Field

In this stage the researcher submit a proposal title and advance to the Faculty of Tarbiyah and Teaching Sciences UIN Maulana Malik Ibrahim Malang next set of subjects to be studied. Although pre phase field stage, researcher has done a preliminary observation or initial assessment that aims to obtained and overview of the state of the field and gain certainty between thesis title with the reality on the field. Along with the things mention above, at the same time researchers conducted a literature study, reviewing reference material relevant to the title of the thesis.

2. Fieldwork Phase

In this phase the research do indeed. The first thing to do is file a research permit shall be accompanied by a proposal thesis to the institution concerned. Researchers have not been able to collect data but to wait for the license and the need to introduce themselves first to the subjects or informants and doing observations in the school environment. It was only after the researcher began collecting data, conducting interviews with informants, noting the particulars

²⁵ Hartono, *Bagaimana Menulis Tesis yang Baik*, (Malang: UMM Press), page 160

²⁶ Lexy J. Moelong, *Op, cit.*, page 127

of the documents and record things that are being observed. Researcher trying to obtain as much information about the implementation of Islamic education in Integrated Islamic Junior High School Al-Ghozali Jember and the things that the related. Before doing the interview the researcher prepare in advance a list of questions, but the questions that researcher can develop them if the answers of the informants is too short and direct these questions to focus research.

3. Analysis Data Phase

The data has been collected during the fieldwork is still the raw data, disheveled, and therefore need to be analyzed so that the data is neatly and systematically. In this phase researcher classify and organize data into a pattern so as to produce a clear description, detailed and systematic. As has been explained in advance the data analysis conducted during and after data collection. To check the validity of the data the researcher not only gain information from an informant alone, but also should obtain information from other informants as a comparison, so do not rule out the possibility of new data obtained.

B. Research Finding

1. Concept and Education System of Islamic Education in Integrated Islamic Junior High School Al-Ghozali Jember

Islam has universal values. Education in Islamic perspective cannot be disengaged of the fact and purpose of human creation. Education in Islamic Perspective means effort in preparing human consciousness, ability, and responsibility to run human creation's mission. Allah has clearly stated that mission in Al Baqarah : 30

وَإِذْ قَالَ رَبُّكَ لِلْمَلٰٓئِكَةِ اِنِّىْ جَاعِلٌ فِى الْاَرْضِ خَلِيْفَةً ۚ قَالُوْۤا اَتَجْعَلُ فِىْهَا مَنْ يُّفْسِدُ فِىْهَا وَيَسْفِكُ الدِّمَآءَ وَنَحْنُ نُسَبِّحُ بِحَمْدِكَ وَنُقَدِّسُ لَكَ ۗ قَالَ اِنِّىْۤ اَعْلَمُ مَا لَا تَعْلَمُوْنَ ﴿٣٠﴾

(Wa idz qoola robbuka lilmalaa,ikati innii jaa'ilun fi al,ardli kholiifatan, qooluu ,ataj'alu fiihaa man yufsidu fiihaa wa yasfiku addimaa,a wa nahnu nusabbihu bihamdika wa nuqoddisu laka, qoola innii ,a'lamu maa laa ta'lamuuna)

Behold, thy Lord said to the angels: "I will create a vicegerent on earth. "They said:"Wilt Thou place therein one who will make mischief therein and shed blood?-whilst we do celebrate Thy praises and glorify Thy holy (name)? "He said."I know what ye know not".⁴

Integrated Islamic School is institution implement islamic education concept based on Qur'an and Sunnah. Islamic education is one offers a great ideas of the foundation Integrated Islamic School Asosiation as solution in preparing civilized and dignified future generations of Islam. Therefore, its concept and a clear identity in existence are needed. Ustadz Sudiyanto, the

⁴ Mushaf Al-Qur'an Terjemah. page 6

headmaster of Integrated Islamic Boarding Junior High School Al-Ghozali states, that:

Pendidikan Islam di SMPIT Al-Ghozali menyesuaikan dengan kurikulum JSIT yang mengimplementasikan konsep pendidikan Islam berlandaskan Al-Qur'an dan As Sunnah dan lebih menekankan pada tilawah, tazkiyah, dan ta'limah. Namun tetap menggunakan kurikulum kemendikbud. Sekolah SMPIT Al-Ghozali Jember mengkombinasikan keduanya .⁵

(Islamic education in Islamic Boarding Integrated Junior High School Al-Ghozali Jember adjusts to Islamic Integrated School Network Curriculum that implement an Islamic education relied on Al-Qur'an and As Sunnah such as *tilawah*, *tazkiyah*, and *ta'limah*. But for the formal school, it uses a curriculum from Ministry of Educational Affair, so we combine both of them).

The integrated Islamic Junior High School Al-Ghozali Jember is part of Ministry of Educational Affair that combines Islamic education like *Tilawah*, *Tazkiyah*, and *Ta'limah*. The Islamic Studies normally is formal study at School which lasts for two hours in a week. whereas, it is different with Islamic education in Boarding that last for all day long.

Pendidikan itu cenderung pada upaya pembinaan pribadi, sikap mental dan akhlak anak didik. Sehingga pendidikan Islam itu adalah pembentukan pribadi muslim yang taat, berilmu pengetahuan dan beramal sholeh. Jadi pendidikan Islam adalah usaha sadar dari pendidikan terhadap perkembangan fisik dan psikis anak didik sesuai dengan ajaran Islam menuju terbentuknya kepribadian muslim yang utuh.⁶

(Education tends to construct individual development, mental attitude, and student character. While, Islamic Education builds muslim religiously that have good intellectual and deed. Those show that Islamic education is an effort towards students in both physical and psychological development according to Islamic line regarding to its purpose in constructing comprehensive muslim personality).

⁵ Interview with ustadz sudyanto (Headmaster of Integrated Islamic Boarding Junior High School Al-Ghozali Jember), Monday, 30 March 2015 time 10.00-12.00 AM in the office.

⁶ Interview with ustadz Ismail (vice of Headmaster, Kepesantrenan Departement) Monday, 6 April 2015 time 10.00-11.00 AM in front of Mosque

Islamic education strives for forming islamic value besides construct student's intelligence and good deed. The statement is then completed by Ustadz Ismail as the vice of headmaster, Boarding Department of Integrated Islamic Junior High School Al-Ghozali as follow:

Asrama disini sebagai media pengembangan pendidikan Islam. Salah satunya adalah mengembangkan potensi anak melalui tahfidzul Qur'an di asrama dan ada mentoring pekanan yang dibimbing oleh pendamping akademik.⁷

(Islamic boarding becomes media development of Islamic education. One of them is develop students potential on *Tahfizil Qur'an* and Mentoring every week by academic guide)

Islamic education plays out as media to develop student's potential and matured with mentoring, as the primary steps for Islamic educational evaluation guided by Academic advisor, and Al Qur'an guiding as well. These ways rely on Al-Alaq :1-5

أَقْرَأْ بِاسْمِ رَبِّكَ الَّذِي خَلَقَ ۝ خَلَقَ الْإِنْسَانَ مِنْ عَلَقٍ ۝ اقْرَأْ وَرَبُّكَ
الْأَكْرَمُ ۝ الَّذِي عَلَّمَ بِالْقَلَمِ ۝ عَلَّمَ الْإِنْسَانَ مَا لَمْ يَعْلَمْ ۝

(Iqro' bismi robbika alladzii kholaqo. kholaqo al,insaana min 'alaqin. ,iqro, wa robbuka al,akrom. Alladzii 'allama bilqolam. 'allama al,insaana maa lam ya'lam)

Recite in the name of your Lord who created. Created man from a clinging substance. Recite, and your Lord is the most Generous. Who taught by the pen. Taught man that which he knew not.

The concept and the great principle must be based on a strong pillar to implement Islamic Education in this institution. The student must implement *Tilawah*, *Tazkiyah* and *Ta'limah* in their daily activities.

⁷ Interview with ustadz Ismail (Vice of Headmaster, Kepesantrenan Departement), Monday, 6 April 2015 time 10.00-11.00 AM in front of Mosque.

Through this custom, student's daily behaviour will reflect their daily activities. some pillars of Islamic education which then will be systematically developed the value as a pillar among others.

a. *Hablumminallah*

The Islamic education is teach to believe and love to Allah. Many ways can be conducted to create loving to Allah, one of them is accustom the students to always put Allah in any works and activities. That statement is in line with statement of Ustadz Ismail as Educational Religion's teacher.

*Pendidikan itu ya tidak hanya membekali siswa pengetahuan. Apalagi pendidikan Islam, siswa tidak seharusnya Cuma diberikan pengetahuan mengenai Allah saja, melainkan juga dengan membiasakan siswa untuk mengenal Allah. Untuk di KBM kan jelas, itu sesuai dengan Kemendikbud mengenai pembelajaran Agamanya. Nah untuk program pendidikan Islam sendiri, ya dengan kegiatan di asrama itu.*⁸

(Education is not merely supply intellectual and science to the students. Islam adjusts students to know more about Allah and its ways to get closer to Him. It is in line towards education Affair's curriculum while the islamic programs are fully conducted by activities in boarding.)

Drawing toward Allah will deliver human towards *muraqabatullah* (always feel watched by Allah) the manifestation in loving Allah. then, Ustadzah Zahra as the Wali Asrama added :

*Di Asrama itu, siswa wajib melakukan sholat wajib secara berjamaah. Membiasakan sholat rowatib, dzikir pagi dan sore, puasa sunnah, dan kegiatan lain yang mendorong siswa untuk mengenal Allah. Karena kan dari mengenal itu, akhirnya mencintai Allah. Sedangkan untuk yang non asrama, sekolah yang mengatur dengan mewajibkan sholat dhuha dan dzikir bersama.*⁹

(Students are accustomed to conduct congregation prayer, rawatib, routine dhikr, fasting sunnah, and another activities to encourage students

know Allah closer. This ends students to love Him. while for non-boarding, the academic organize to conduct Dhuha prayer and dhikr.)

b. *Hablumminannas*

Muslim owns the spirit and values of the high Islamic brotherhood. These values will also be instilled in student as form of awareness and a part of the Muslims with *hablumminannas* (relations among human).

In daily activities, the culture of *Hablumminannas* is always run by teacher and students of Integrated Islamic Junior High School Al-Ghozali Jember, such as exposure by Ustadzah Zahra as Islamic Boarding's Guide.

Siswa tentu harus memiliki hubungan yang seimbang antara hubungan vertical dan horizontal. Sehingga selain mencintai Allah, maka seluruh komponen sekolah harus mencintai sesama. Kami selalu membiasakan siswa untuk bersedekah sepanjang waktu, selain itu membangun persaudaraan dengan siswa lainnya dengan melakukan kegiatan bersama yang mengharuskan mereka berinteraksi seperti dzikir bersama itu.¹⁰

(Students surely own balance vertically and horizontally relationship. Beside loving to Allah, students are expected to love their fellow. We also accustome them to have alms. In addition, they are encouraged to have activities that allow interactions among them).

One thing cannot be put aside of *hablumminannaas* is brotherhood. This interaction allows students to unite any characters. It is also clarified by ust. zahra,

Di asrama diajarkan untuk menyatukan berbagai macam karakter. Mereka harus dapat memahami karakter teman lainnya. Konflik pasti ada, namun bagaimana wali asrama membimbing mereka untuk menyelesaikan masalah mereka sendiri.¹¹

(In boarding, students are encouraged to unite their characters. They suppose to understand their friends. Despite of conflict among them, it depends on how the teacher guide them to solve the problems).

c. Maintaining Cleanliness, Neatness, and Beauty

Student should be given early awareness and understanding for the obligation to maintain cleanliness, neatness, and set the environment to keep beautiful. Thus, the student will get a reward from Allah.

*Kita sering mendengar bahwa kebersihan itu sebagian dari iman. Oleh karena itu, di asrama ada kegiatan rutin mingguan untuk kebersihan dan kerapian lingkungan asrama. Ini di luar piket rutin harian siswa di asrama. Selain itu, setiap siswa wajib menjaga kebersihan dan kerapian barang pribadi masing-masing.*¹²

(We regularly hear that cleanliness is next to godliness. Due to that, boarding department held weekly cleaning activities around boarding. Another than that, each student must keep their goods clean and tidy)

The objectives of this activity is to appear good-habit awareness in islamic ways covering pray before and after eating, keep the body health, and keep the surrounding clean.

d. Independence

Student is equipped with the passion and determination to have independence in their life. It means that in facing of all the problems independent attitude is the basic for a person to gain success in life. This is in accordance with the following statement:

*Nilai plus dari asrama adalah kemandirian. Siswa yang tinggal di asrama tentu berbeda dengan yang non asrama. Dengan mandiri, maka siswa akan terbiasa mengatur waktu mereka sendiri dan dengan mengatur waktu tersebut maka mereka bisa membuat planning belajar. Sehingga antara asrama dan non asrama memiliki perbedaan yang signifikan.*¹³

(The extra values of boarding school is about independence. Students who stay in boarding surely have significant differences with they who don't. This character appears student's awareness to manage their times).

e. *Uswatun Hasanah*

When people live in the community, they need *istiqomah* (commitment) and good role model. For student, as implementing *istiqomah* and good role model, they will have public positive image.

*Guru merupakan uswatun hasanah bagi siswa, Alhamdulillah, guru di SMPIT ini tidak ada yang merokok. Sehingga siswa mendapat uswatun hasanah. Intinya semuanya ya kita mulai dari pihak guru, sebagai pihak yang paling dekat dengan siswa.*¹⁴

(Teacher is a good model (*uswatun hasanah*) for students. Alhamdulillah, we have no smoker teacher that leads students to have *uswatun hasanah* (good role model). The point is about maintaining closeness towards students).

Teacher is the first and main model to students at school for they are the closest person to students. Besides, students are organized to give good example towards their junior.

*Sebagai siswa kelas 8, tentu saya harus bisa menjadi contoh yang baik bagi adek kelas maupun siswa lainnya. Karena di sekolah, saya wajib membimbing adek kelas dalam segala kegiatan sekolah.*¹⁵

(As the 8th grader students, i must give good example to my juniors or another students. At school, it is compulsory for me to guide them in every school activities).

f. Discipline

Discipline is important to be practiced in education involving in Integrated Islamic Junior High School Al Ghozali Jember.

Untuk kedisiplinan kita memiliki penawaran yaitu dengan menggunakan system point. Setiap anak yang melanggar kedisiplinan, maka poin

mereka akan berkurang yang nantinya akan menjadi PR di rapot akhlak. Begitu sebaliknya, ketika siswa dapat disiplin, maka mereka akan mendapatkan reward. Contoh kedisiplinan itu, seperti tidak menggunakan HP baik di sekolah maupun di asrama, namun di asrama disediakan HP yang bisa digunakan siswa untuk menghubungi keluarga di rumah. Selain itu disiplin dalam hal ibadah maupun yang terkait dengan sekolah.¹⁶

(We offer credit point to practice discipline. Each student breaks the rule, their point will reduce that is recorded in report book. On the contrary, as the students have good discipline, they will get reward. The examples of its discipline are not using personal HP in school, rules about worship activities, and another rules at school).

g. Concern in studying

Concern in studying can be achieved while living at boarding. This has strong correlation with another boarding activities that force students to manage their time well.

Saya merasa lebih fokus, karena kegiatan yang fullday jadi saya tidak sempat memikirkan hal yang lain kecuali sekolah. Selain itu lebih produktif, sehingga semua kegiatan asrama dapat kami back up sendiri.¹⁷

(I get more focus for the crowded activities force me to think more about activities. then, i seem to be more productive that all boarding activities can be manage well by ourself)

SMPIT Al-Ghozali Jember membagi asrama menjadi dua kelompok dengan lokasi yang berbeda. Asrama untuk putra berada di area sekolah, sedangkan asrama putri berada di perumahan sekitar sekolah. Ini dimaksudkan untuk meminimalisir interaksi antara putera dan puteri sehingga peserta didik dapat fokus dengan belajar.¹⁸

(The integrated islamic Junior High School Al-Ghozali Jember devide the boarding become two groups with difference locations. The boys boarding in school area, while the girls boarding in around of school. It is mean to minimize students interaction between boy and girl. So, they are can focus studying)

Islamic education curriculum in Integrated Islamic Junior High School Al-Ghozali Jember adjust *JSIT* curriculum that oriented with Al-Qur'an and Haidts. On Al-Qur'an, the Islamic education purpose is the purpose of human being created that is as *Khalifah* and servant to Allah that have a worship obligation. But the study of Islamic religion in school use *KTSP* curriculum according education affair departement.

The integrated Islamic Junior High School Al-Ghozali Jember formulate Islamic education be three aspect, that is *Tilawah*, *Tazkiyah*, dan *Ta'limah*. The treatment is do in boarding. Boarding is a media to develop Islamic education in this school, so the student have Muslim character.

The impact of Islamic education is formulation of pillars, that is *hablumminallah*, *hablumminannas*, maintaining cleanliness, neatness and beauty, independent, *uswatun hasanah*, independence, dicipline, and concern in studying.

2. The Implementation of Islamic Education through the activities, culture, and daily environment in Integrated Islamic Junior High School Al-Ghozali Jember

The basic concept and values system which is used in the Implementation of Islamic education was developed by Integrated Islamic Junior High School Al-Ghozali Jember is integrated with learning process. Although this institution does not has material or specific subjects concerning about Islamic education, however those values directly include into all subjects, as described by Ustadz Ismail as Islamic Studies teacher.

Untuk mata pelajaran pendidikan agama, mendapatkan porsi sebagai mana yang telah ditentukan oleh kemendikbud yaitu dua jam pelajaran tiap pekannya. Nah, khusus untuk yang di asrama, ada tambahan pembelajaran. Salah satunya adalah kajian Al-Qur'an yang dilakukan di akhir pekan pada yaitu tasmi', tahsin dan tafsir. Jadi siswa disini selain diharuskan untuk membenahi cara baca juga belajar tafsir Al-Qur'an

*karena kami meyakini bahwa Al-Qur'an memuat segala hal tentang kehidupan apalagi pendidikan.*¹⁹

(Islamic studies obtains 2 hours credit a week as regular rules by Education Affair. in boarding, the subject is added with Al Qur'an studies hold on the weekend which covers *tasmi'*, *tahsin*, and *tafsir*. So students should correct their Arabic pronunciation, besides the also study tafsir of Qur'an for it covers all the way of life including education)

Islamic education is not sufficiently obtained in formal school for students should increase their religious affair, that practically it needs internalization of islamic education value in each student's life. Islamic Education conducts missions to construct muslim generations that own comprehensive and intergrative islam understanding.

(Al Qur'an class is flagship program. Formerly, This program targets 5 juz to achieve the graduation which increases its target into 10 juz. This program covers Tahfidz, Tartil, and Tahsin. Students should follow some criterias at the enrolment test to involve in this class).

Al Qur'an class is divided into three phases of class, a) *Tahsin* Class, preparation class to study basics of Al-Qur'an, b) *Tartil* Class, *Tajwid* Correction Class, and c) *Tahfid* Class, to enhance *Tilawah* and Al-Qur'an Memorization.

2. Diniyah

Diniyah is a structured learning process conducted at out of formal school adjusted to daily program and attached in *Mutabaah Amal yaumi*. Below are some teaching and learning process conducted in Boarding.

- a. Al Qur'an. Students are accustomed to love Al Qur'an by reciting, memorizing, and studying it deeper.
- b. Hadits. Students are expected to comprehend and implement hadits in daily life as well memorize particular part of it.
- c. Fiqh. Students are requested to study and implement fiqh to increase tolerance among muslims.
- d. Aqidah. Students are insulted to always have faithful towards Allah by knowing Him deeper as well as getting closer to Him

²¹ Interview with Ustazah Asiyah (Al Qur'an Teacher) Friday, April 24 th 2015 at 08.00-09.00 AM in Head of Qur'an office

- e. Arabic. Students applies Arabic along their daily interaction.
- f. English. Students should implement English, besides Arabic, along their daily interaction.

c) Boarding Divisions

School separate boarding for male and female students. For male students, the boarding lies at school area, while for female, they are located on three different places. They lies in Rumah Qur'an Putri 1 at Kaliurang Street no. 06, *Rumah Qur'an putri 2* at Griya Permata Kampus C10 Tegalgede, Sumber Sari, Jember and the *Rumah Qur'an putri 3* is just in the front of *Rumah Qur'an putri 2*.

d) Learning Method

Some methods applied in Integrated Islamic Junior High School Al - Ghazali Jember are as follows.

1. Memorizing Al Qur'an

This method is specified for tahfidzul Qur'an. Integrated Islamic Junior High School Al-Ghozali Jember adjusts 10 juz achieved in three years study. Besides students should memorize particular hadits.

*Setoran hafalan Qur'an dilakukan setiap hari pada sore hari sekitar jam lima sore dan dilanjutkan setelah sholat maghrib, sampai selesai. Target hafalan peserta didik rata-rata setengah halaman setiap harinya, namun juga menyesuaikan dengan kemampuan peserta didik dalam menghafal.*²²

(Tahfidzil Qur'an is done everyday on evening after school about at 17.00 PM and continue after maghrib praying. The target of tahfidzil

2. Discussion

This Program is under controlled by boarding advisors.

3. Project

In the last session of study, students conduct project to observe particular things around the school.

e) Materials

students can access material in either library or internet laboratory by browsing internet to enrich knowledge.

f) Mentoring

Mentoring is particular program held once a week. In this program, the academic advisor guides 9-10 students. Students are free to set the topic to learn. Usually students learn the subject deeper as they find its difficulties in study or discuss about recent teenager issues.

*Mentoring adalah perkumpulan yang bertujuan untuk berdiskusi, sharing, yang terdiri dari 9-10 siswa. Dalam mentoring juga ada kontrol amal yaumi seperti yang terdapat di asrama.*²³

(Mentoring has its objectives on discussion and sharing in group of 9-10 students. This program also has daily record as well as in the boarding).

Due to its specific program of Integrated Islamic Junior High School Al-Ghazali Jember, students must follow the program as its urgent objectives as stated by Ustazah Afifah, a Counseling Teacher,

*Tujuan utama adalah mengcover kabar negatif mengenai Islam serta membiasakan anak-anak melakukan amalan-amalan wajib kemudian membiasakan amalan sunnah. Dari kebiasaan, maka akan terbentuk dengan sendirinya. Yang wajib sudah terlaksana dengan baik, kemudian ditambah dengan amalan sunnah.*²⁴

(The main objective of this program is to encounter negative issues of Islam and to accustom the students to conduct their fardhu and sunnah. It will increase their awareness to implement that fardhu and sunnah)

It is a reinforcement towards all they get from formal school. As Ustadz Ismail, Chief of Student Affair, stated about mentoring,

*Seperti yang kita ketahui, bahwa pembelajaran tidak berhenti pada konsep, kemudian proses. Melainkan perlu adanya pengayaan melalui mentoring pekanan yang di damping oleh pendamping akademik. Setiap pendamping akademik memegang 9-10 siswa. Mentoring ini dilakukan untuk mengetahui perkembangan siswa yang lebih personal.*²⁵

(As we know that learning doesn't end within concept and process. it needs enrichment through mentoring conducted by academic advisor in a group of 9-10 students. This program allows teacher to know more personal about students)

6. What are the indicators of Islamic education?
7. How does the islamic education affect towards students?
8. How does the islamic education implemented?
9. What is the function of boarding ?
10. How does the religious lesson conducted?

Result!

1. Education does not merely about transferring knowledge to the students. moreover, islamic education should not inform only about Allah, but also teach student's accustom to get Allah closer. As the formal teaching and learning acitvity of religious lesson uses curriculum from the

government, the islamic education tends to comprehend it by boarding activities.

Education should tends to build self construction, mental, and student's behaviour. thus, islamic education will generate moslems with ideal characteristics such as loyal, intelligent, and generous. It can be concluded that islamic education is a conscious effort of education to the development of students' physical and psychological in accordance with Islam value towards the establishment of Muslim personality intact.

2. The curriculum applied by SMPIT Al-Ghozali is *Kurikulum 2006 (KTSP)*, which adjusts to the curriculum of ministry of education and culture. yet, this school also implements curriculum 2013 as JSIT instruct its member to apply it. The reflection of curriculum 2013 in the school are *dhuha* prayer congregation, mentoring, and *solat jama'ah* which are recorded in *mutabaah yaumiyah*. These activities will be more emphasize on student's islamic character.
3. The implementation of islamic education covers three aspects. firstly, it is daily activities. This evaluation control worship activities and boarding events that the points are attached in *mutabaah yaumiyah*. The Second is weekly evaluation that evaluate Qur'an class with some activities involved as *tahfidzul Qur'an*, *tafsir*, *tahsin*, and *tasmi'*. The thhird is monthly events such as *muhadhoroh*, to sharpen student's confidence, and student's islamic intelligence.

4. This school uses point system to maintain discipline. This way breaks the old habit in giving punishment where students accepted physical and psychological punishment. On the other hand, reward will be awarded to the model pupil. Besides, the school also teaches about well-behaved in the accordance to akhlaqul karimah, as a part of islamic education.
5. Daily evaluation will record about daily activities attached in mutabaah amal yaumi and controlled by dorm companion. While monthly evaluation will be representative of daily evaluation to be summarized in report book. Its percentage will be determined by counseling teacher, dorm companion and academic advisor.
6. it needs cooperation among students, parents, dorm companion, and academic advisor and to monitor the implementation of islamic education. The failures somehow are not from the students, but it possibly happens for they forgot to note on what they have achieved.
7. One of islamic boarding school effect is having independence. This personality leads student in having independence to manage time productively for the structured schedule. From that point, students are able to arrange the time for study.
8. The application of islamic education is under control the dorms boarding as major student's activities are controlled in boarding. an effect of application islamic education is arousing student's leadership where they can actively participated in the school events in terms of organizing, conducting, and evaluating the program. This characteristics will awaken

student's sensitivity to be active in the events though they are not listed as its committee.

The steady cooperation among students is the effect of the stable unity established. having often interaction in both school and boarding establishes strong unity to work any program together.

Spare time creates negligent. Some students are just wasting their time without making positive activities. The programs in both boarding and school are arranged effectively in case to avoid student's spare time. Under guidance of the teacher, Students are expected to take their wings out to be good moslem.

9. Boarding takes main role to develop islamic education. One of the examples is fostering student's talent in tahfidzul Qur'an. While another part of developing talent is mentoring which is controlled by academic teacher.

Another part of boarding, independence, becomes its excess that differ from non-boarding school. Thus the output generated will be significantly different as the boarding students have big chance to manage the time productively.

The main term in boarding, a living-together place, appears cleanliness problem. The management arranges daily schedule that students must take their turn. besides, its weekly program is held regularly on Sunday after language class and conducting physical exercise.

10. Religion lesson has been adjusted to curriculum of the Ministry of culture and education as the two hours regular time for it. Due to that, boarding department adds extra lessons for the students stay there. Some of them are about Al Qur'an studies that cover tasmik, tahsin and tafsir which is held in the weekend. Thus the students are insured to study deeper not only about the way to read but also the tafsir for this holy Qur'an loads all features of life including education.

1. Who is the founder of SMPIT Al-Ghozali Jember

Result!

The founder of SMPIT Al-Ghozali, Ustadz Khoirul Hadi, established this school in 2007. He is alumnus of LIPIA. People around Jember recognise him well.

Formerly, he found Al Ihlas foundation that cover juga sudah mendirikan yayasan, yaitu yayasan Al-Ihlas yang kemudian SDIT Harapan Ummat. Then he drew out the higher level than elementary school. Later he found integrated Junior high.

As the time elapsed, he still needed another supporting operational. Thus he found another foundation to support the school operational. Some persons are included into that institution besides Mr. Khoirul Hadi such as Mr. Mhfudzi Husodo and Mrs. Ni'am (his wife) who really support the operational of the school.

Gradually, the financial of the school was still charged by LAZ (Amil Zakat Institution) of Rizki as it has a matter in financial. This continues up to now.

Another persons involved the process of school establishment . some of them are the lecturers from University of Jember like Pak Didik, Dr. Marianto, Pak Habib from University of Muhammdiyah. At present, the director of foundation is under control by Pak Suwardi, a lecturer of Politechnic of Jember.

The education staff are mostly graduated from University of Jember including the principal, Mr. Sudi. He has experienced to found another SDIT and SMPIT in wuluhan that settled its management. He then is requested to help Ma'had Ibnu Katsir in Jember to support the development of SMPIT Al-Ghozali.

The former students of this school are mainly from the colleagues of school founder under the trust. Due to the broader advertisement, the students are not coming from Jember but some towns outside Jember such as Bondowoso, Banyuwangi, Bima etc.

Boarding is new product of education institution. As the former build the SMPIT, the founder has been thnking of the boarding. nevertheless,the boarding was in small house apart of the main shool building due to lack of staffs and facilities.

however, the cooperation begun between the school and Ibnu Katsir foundation. This foundation is ma'had Ali concerned on tahfidzul Qur'an and dirodah Islamiyah. The plan to build boarding has been thinking of since the school established. It has been incarnated since that cooperation with Ma'had Ibnu Katsir. formerly, boarding was established to settle the students out of town but then it was developed into islamic boarding.

2. What is the duty of dorm companion?
3. What is the benefit of islamic education in boarding system?
4. What is the boardin activity related to islamic education?

Result !

1. I am the chief of boarding for rumah Qur'an 1. Ustadzah Aisah is the dorm companion for rumah Qur'an 2. While the dorm companion for rumah Qur'an 3 is Ustadzah abidah.
2. The duty is monitoring and taking care students starts from wake up to go sleeping again. besides, we should control mutabaah yaumi of students. Every points in mutabaah yaumi has been targeted weekly and reported to counseling, academic advisor, and parents.
3. Students are accustomed to cover their body wearing suitable outfit such as wearing trouser though the skirt has already covered, maintaining interaction with the opposite sex, and maintaining well behaviour towards elder pople as well. those are the direct effects of islamic education in boarding. moreover students must be more dependent and discipline.

Students will be encouraged by another friends. A student will be motivated to do the same or more of their friends do such as encouraged to do tilawah, recite or murojaah together. it is impossible for them to do not do the same thing. That is the reason of the students will be more productive.

Henceforth boarding system teaches students to understand each other and unity the difference. It is about how we guide them to solve their matters.

4. Students must do congregational prayer. Accustomed to conduct rawatib, morning and evening dzikr, fasting, and encourage students to conduct activity that makes them close to Allah that ends up them love to Allah. For those who do not stay in the dormitory, school has arranged them to conduct dhuha and dzikr.

Students should have balance relationship between vertical and horizontal, love to Allah and care to others. We also accustomed students to sedekah, establish brotherhood, and conduct activity together such as dzikr jamaah.

1. What makes counseling in SMPIT Al-Ghozali differ with another school?
2. Does counseling teacher run Mentoring? What is mentoring?
3. What is its aimed to?
4. Who are the tutors?

Result !

1. There is no significant difference of counseling in this school and the others. A bit duty of counseling runs in this school monitors students to be coordinated with academic advisor in arranging adab report.
2. Mentoring means such a group of meeting to discuss and sharing about any topic has been determined. this group allows mutabaah yaumiyah to be evaluated as run in the boarding.
3. The main aim of mentoring is to cover negative issues related to Islam as well as to custom the students doing fard and sunnah. The habit then grows into necessities which makes students willingly to conduct them.

Counseling team, hereof, is given more opportunities in helping students go through their teens. This activity allows students to discuss teenagers problems in sharia or judge perspective. In short, mentoring reinforces students on information or knowledge they have got.

Mentor or murabbi comes from teenager's consultant agency that is youth association takes care on teenagers. This activity emerges to cover students from juvenile delinquency. School broadly opens another possible activities to overcome that.

Another part of boarding, independence, becomes its excess that differ from non-boarding school. Thus the output generated will be significantly different as the boarding students have big chance to manage the time productively.

The main term in boarding, a living-together place, appears cleanliness problem. The management arranges daily schedule that students must take their turn. besides, its weekly program is held regularly on Sunday after language class and conducting physical exercise.

10. Religion lesson has been adjusted to curriculum of the Ministry of culture and education as the two hours regular time for it. Due to that, boarding department adds extra lessons for the students stay there. Some of them are about Al Qur'an studies that cover tasmik, tahsin and tafsir which is held in the weekend. Thus the students are insured to study deeper not only about the way to read but also the tafsir for this holy Qur'an loads all features of life including education.

1. Who is the founder of SMPIT Al-Ghozali Jember

Result!

The founder of SMPIT Al-Ghozali, Ustadz Khoirul Hadi, established this school in 2007. He is alumnus of LIPIA. People around Jember recognise him well.

Formerly, he found Al Ihlas foundation that cover juga sudah mendirikan yayasan, yaitu yayasan Al-Ihlas yang kemudian SDIT Harapan Ummat. Then he drew out the higher level than elementary school. Later he found integrated Junior high.

As the time elapsed, he still needed another supporting operational. Thus he found another foundation to support the school operational. Some persons are included into that institution besides Mr. Khoirul Hadi such as Mr. Mhfudzi Husodo and Mrs. Ni'am (his wife) who really support the operational of the school.

Gradually, the financial of the school was still charged by LAZ (Amil Zakat Institution) of Rizki as it has a matter in financial. This continues up to now.

Another persons involved the process of school establishment . some of them are the lecturers from University of Jember like Pak Didik, Dr. Marianto, Pak Habib from University of Muhammdiyah. At present, the director of foundation is under control by Pak Suwardi, a lecturer of Politechnic of Jember.

The education staff are mostly graduated from University of Jember including the principal, Mr. Sudi. He has experienced to found another SDIT and SMPIT in wuluhan that settled its management. He then is requested to help Ma'had Ibnu Katsir in Jember to support the development of SMPIT Al-Ghozali.

The former students of this school are mainly from the colleagues of school founder under the trust. Due to the broader advertisement, the students are not coming from Jember but some towns outside Jember such as Bondowoso, Banyuwangi, Bima etc.

Boarding is new product of education institution. As the former build the SMPIT, the founder has been thnking of the boarding. nevertheless,the boarding was in small house apart of the main shool building due to lack of staffs and facilities.

however, the cooperation begun between the school and Ibnu Katsir foundation. This foundation is ma'had Ali concerned on tahfidzul Qur'an and dirodah Islamiyah. The plan to build boarding has been thinking of since the school established. It has been incarnated since that cooperation with Ma'had Ibnu Katsir. formerly, boarding was established to settle the students out of town but then it was developed into islamic boarding.
