Key word: The Reasons, Requests, Dispensation Marriage

Underage marriage now is a phenomenon that occurs in Indonesian society. Almost every region has the potential, and the reasons of its own, in supporting the emergence of this phenomenon. In this case, it can be proven through the incoming data revealed by Lamongan Religious Court, that the request Dispensation marriage lawsuit in 2010 there were 74 lawsuit, then in 2011 there were 87 lawsuit, and then in 2012 increased to 118.

This study focuses on the Blimbing Village, District Paciran, Lamongan of which the people perform marriage dispensation to be submitted to the Religious Lamongan. This research uses empirical research methods with a qualitative approach. Most of the primary data collected through interviews and field observations. Literature related to this issue, used as secondary data. Having accumulated then analyzed using descriptive analysis method.

The results of this study it can be concluded that the Society in the Village Blimbing, Paciran District, Lamongan district, there are many proposal of marriage dispensation, most of the dispensations are motivated by the filing of premarital relations, but there are some people who filed before the premarital pregnancy, because the parents was worried about his son who would fall into unwanted things. With the results of a review of Islamic law that it is allowed under Islamic law regulates the legal age limit of a child's age. If it is viewed from the Medical and psychology rasons that underage marriage are not recommended to be implemented because it is still considered vulnerable to an immature condition, whether it is the maturity of her personality to build a new family and also at that age is still prone to give birth when the spouse has not reached the age of 20 years old.
