

ABSTRACT

Fatmawati, Churnia. 2014. The Connection between Self Efficacy and Future Otientation on student XII grade of SMAI Al-Maarif Singosari

Advisor : Endah Kurniawati, M. Psi

Keyword : Self Efficacy, Future Orientation

SMAI Al-Maarif Singosari is one of Islamic senior high school, therefore it's implant Islamic values in their method. Grade XII is the last grade in senior high shool, where the teenagers are finishing their studies in school and preparing to go to adult period. For meddling in adult period needs a future orientation with the result that. every individual student have their own future orientation. Self efficacy in one of the influenced future orientation. Bandura says self efficacy in one of the mechanim that shape teenagers future orientation.

The explanation above means that has to be one research about that. The purposes are: (1) to find out the level self efficacy on the student of XII grade of SMAI Al-Maarif Singosari (2) to find out the level future orientation on the student of XII grade of SMAI Al-Maarif Singosari (3) to find out The Connection between Self Efficacy and Future Otientation on student XII grade of SMAI Al-Maarif Singosari.

The method used in this research is quantitative correlational. The sampel in this research is 25% of student population (45 person). Taking of data for this research using questioner method. The data then analyzed the validity and reliability, categorited and analyzed every it's correlation (product moment)

The result of this research shows that the student of XII grade of SMAI Al-Maarif Singosari have a middle self efficacy which 66% and they also have a middle future orientation level 64%. The correlation between self efficacy an future orientation is 0.359, with significant level 0.015, and relating direction was positif, it means the higher student self efficacy, higher their future orientation.
