

ABSTRACT

Riady, M., A. 2014. The Relationship of Self Efficacy with the Career Maturity of Students in SMK Ahmad Yani Jabung Malang. Thesis. Faculty of Psychology, State Islamic University (UIN) Maulana Malik Ibrahim Malang.

Advisor: Jamaluddin Ma'mun, M.Si.

Keyword: Self efficacy, and Career maturity

Vocational students of class XII are at the exploration stage crystallization period, during this time the students begin to identify opportunities and employment levels are appropriate, and implement career options by selecting the appropriate education and training. So that individuals are able to determine a realistic career option by itself is an indication of an individual who has a career maturity. One of the factors that affect a person's career maturity is self-efficacy (self-efficacy). This study aims to determine the level of self-efficacy (self-efficacy) and career maturity in students of SMK Ahmad Yani Jabung Malang, as well as to determine the relationship of self-efficacy (self-efficacy) with career maturity class XII student of SMK Ahmad Yani Jabung Malang.

This research uses quantitative correlation study is to determine the relationship of one variable to another variable. Subjects were taken in the study were students of class XII SMK Ahmad Yani Jabung Malang, amounting to 30 students, consisting of 15 students majoring in Computer Engineering and Networks, as well as 15 students from the Department of Administration and Commerce Marketing. Sampling technique in this study was cluster random sampling technique. Methods of data collection in this study using a scale of self-efficacy (self-efficacy) and career maturity scale. The data analysis technique used is the product moment correlation test.

This study found that the majority of students of SMK Ahmad Yani Jabung Malang have this level of self-efficacy (self-efficacy) is the percentage being 73.3% (22 students), whereas 13.3% (4 students) have a high self-efficacy, and 13.3% (4 students) have a low self-efficacy. For the level of career maturity was found that the majority of students of SMK Ahmad Yani Jabung Malang in middle category with the percentage of 60% (18 students), whereas 20% (6 students) have higher levels of career maturity, and 20% (6 students) have a maturity level career lower. The results showed that there is a significant positive relationship between self-efficacy with career maturity in students of SMK Ahmad Yani Jabung Malang, this is indicated by the correlation coefficient $r_{xy}=0,802$ with $p = 0.000$ and the significance level is at 0.01 so $p < 0.01$, thus it can be concluded that the hypothesis is accepted.
