

ABSTRACT

Yudha, Titis Isma : 2014 *The Relationships of Religious Maturity with Altruistic Behavior Student In Vocational State School of Temayang, Bojonegoro. Thesis, Faculty of Psychology, Maulana Malik Ibrahim State Islamic University of Malang*

Advisor: Dr. H.A.Khudori Soleh, M.Ag

Keyword : *Religious maturity, Altruistic behavior*

This time the behavior student in Vocational State School is very complex. The behaviors like as positive behavior and negative behavior. One example of positif behaviors is helping people. Helping people did by voluntary. In the same as the doctrine in the religion that helping people by voluntary is the highest principle moral. The behavior of helping others by volunteering called altruistic behavior. Altruistic behavior someone is effected by religious maturity. Religious maturity is the religious character and someone's religious maturity shown within the daily behavior based on religious values.

Problem study this research are (1) how does the level of the student's religious maturity, (2) how does the level of student's altruistic behavior and (3) how relation of religious maturity and altruistic behavior student in Vocational State School of Temayang, Bojonegoro. The purpose of this study is to find out how level of religious maturity and altruistic behavior. In addition to know how the relationship between religious maturity and altruistic behavior of student in Vocational State School of Temayang Bojonegoro

The study uses a quantitative approach. The population in this research is 643 students and the sampel is 65 students. The data retrieval using observation, interviews, and questionnaires. For the analyze data, this research using Pearson Product of Moment Correlation and to test the reliability using Cronbach Alpha formula.

The result of study shows religious maturity in high category is 36 students (55,3%), then students with religious maturity in moderate category are 25 student (38,5%) and 4 student (6,2%) with low category of religious maturity. In the variable altruistic behavior show that student with high category is 35 students (53,8%). Then students with moderate category of altruistic behavior are 26 students (40,0%) and 4 students with low category of altruistic behavior (6,2 %). The result of testing a hypothesis show that religious maturity have significant relation with altruistic behavior that is $r_{xy}: 0.641; sig < 0.05$. The relations is positif, it means high religious maturity followed by a high altruistic behavior So, hypothesis in this research, it has relationship between religious maturity and altruistic behavior student in Vocational State School of Temayang Bojonegoro accepted.
