

ABSTRACT

Mubarak, Nafi', agus 2014. The Effect of Spiritual Intelligence on Self-Efficacy of Students of *Madrasah Aliyah Islamiyah Attanwir Talun Sumberrejo Bojonegoro*. Thesis. Faculty of Psychology Maulana Malik Ibrahim State Islamic University of Malang.

Supervisor: Drs. Zainul Arifin M.Ag

Often students in school feel "I cannot do it" and "I cannot afford" when they are given daily assignments and exams both national exams and final exams. Many students commit acts of cheating on her friend whom regard it more master lesson than them due to a lack of confidence in their ability or performance. Self-efficacy as well as spiritual intelligence refers to the skills, abilities and success in finding the meaning of life. The purpose of this study was to examine the effect of self-efficacy on spiritual intelligence and the level of spiritual intelligence and self-efficacy of students of *Madrasah Aliyah Islamiyah Attanwir Talun Sumberrejo Bojonegoro*.

This research was quantitative correlation research. To collect the data, the researcher used spiritual intelligence scale and self-efficacy scale. The subject of this study was a student of class X, XI, XII at *Madrasah Aliyah Islamiyah Attanwir*. The number of subjects was 126 students taken by a double sampling technique that are purposive sampling and quota sampling. To examine the hypothesis, the researcher used simple regression analysis.

The results of the analysis showed that 71.4 % students of class X, XI, XII of *Madrasah Aliyah Islamiyah Attanwir Talun Bojonegoro Sumberrejo* had a moderate or high level of spiritual intelligence and 77 % students had a moderate level of self-efficacy. The result of regression analysis was F_{hit} value of 38 656 and $p = 0.000$ at significance level of 5 %, and the regression coefficient was 0.487. This result mean that there was a positive and significant effect of spiritual intelligence on self-efficacy, because of $p < 0.01$. It was also obtained coefficient determinant or R Square value 0.232. The score of R square indicated that the effective contribution of spiritual intelligence on self-efficacy was 23.2 % and there was 76.8 % other variables affecting self-efficacy. According to the result, the hypothesis proposed by researchers that spiritual intelligence has an effect on self-efficacy of students of *Madrasah Aliyah At- Tanwir Talun Sumberrejo Bojonegoro* was accepted.

Keywords : Spiritual intelligence, Self-efficacy
